

Space Commercialization is critical to the success of our nation's space program

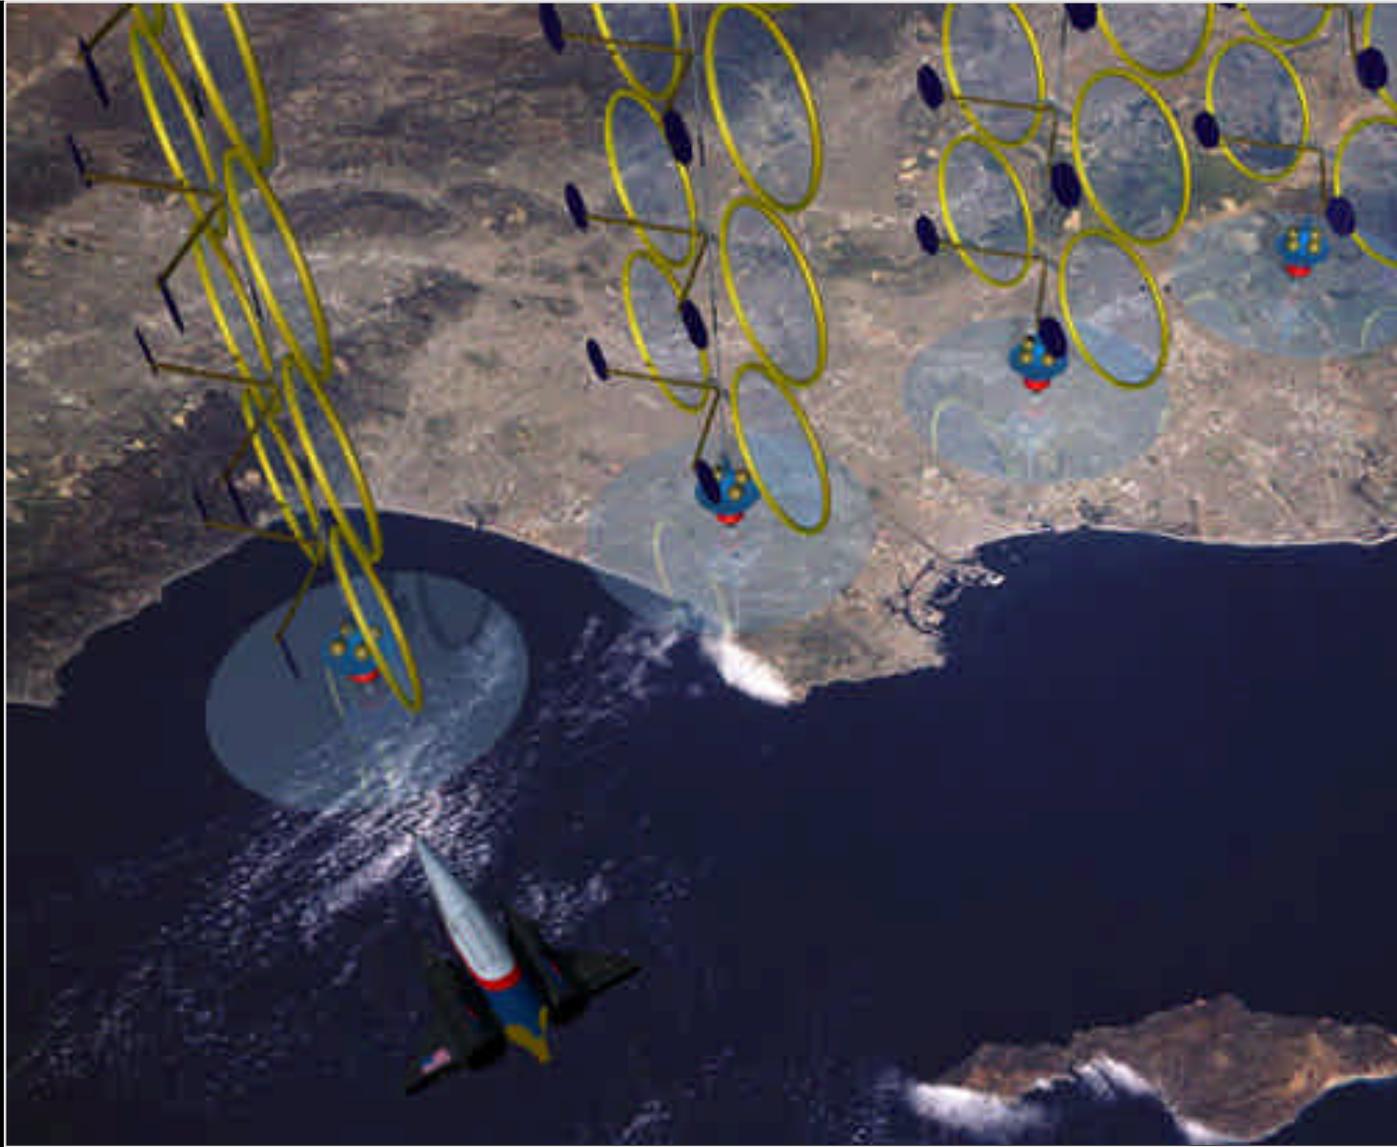

**Bring space to commerce and
commerce to space**

Determine and explore the extent of commercial interest in the development and use of a habitation module

We must create this partnership

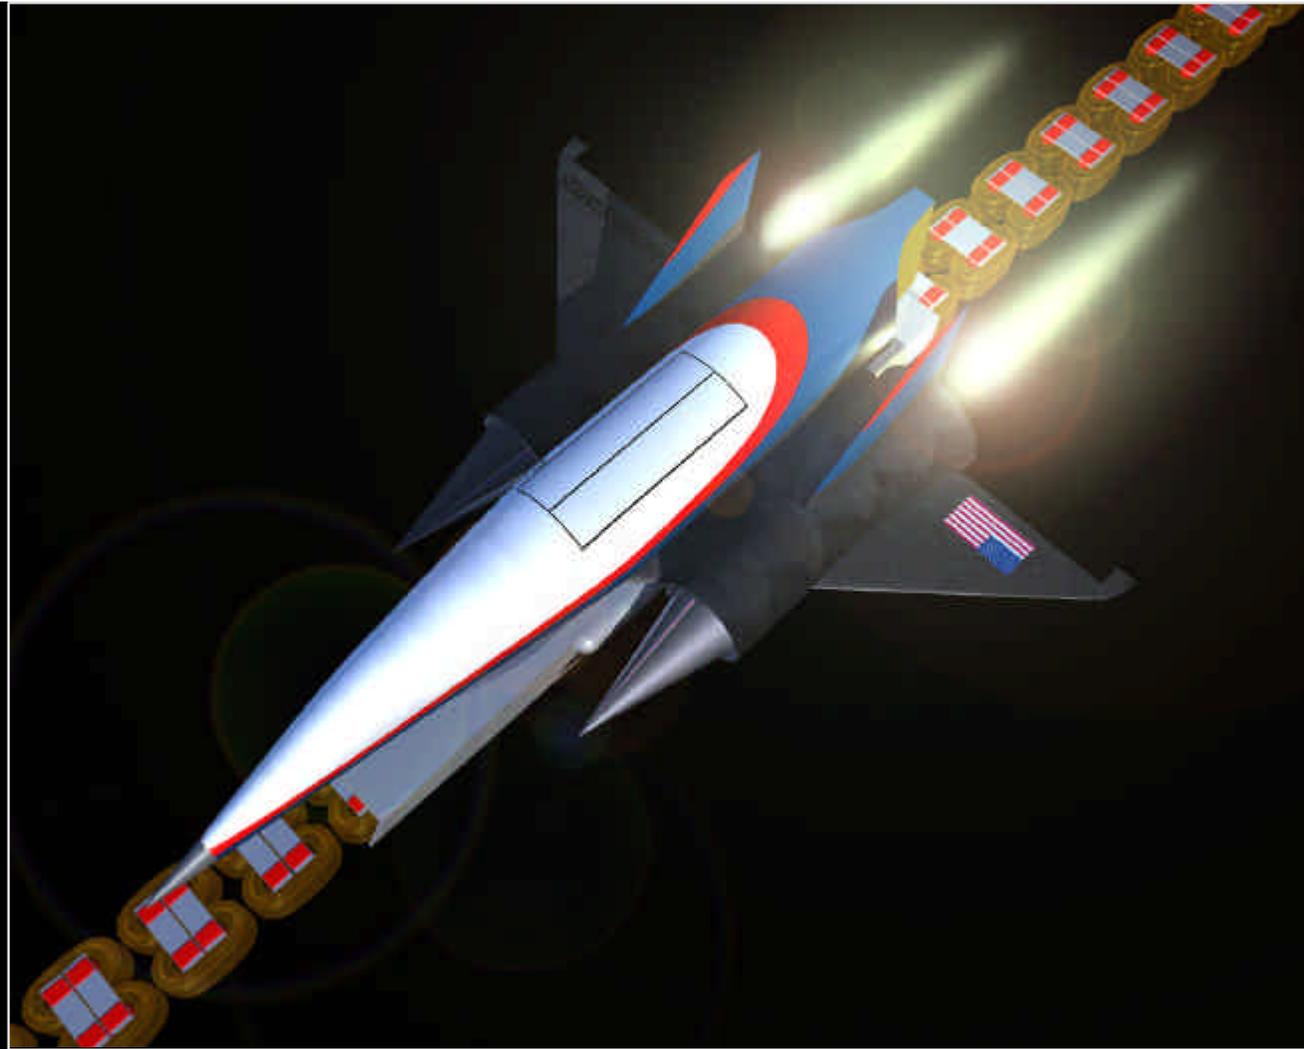

**This opportunity will be a bold pathfinder
for space commercialization**

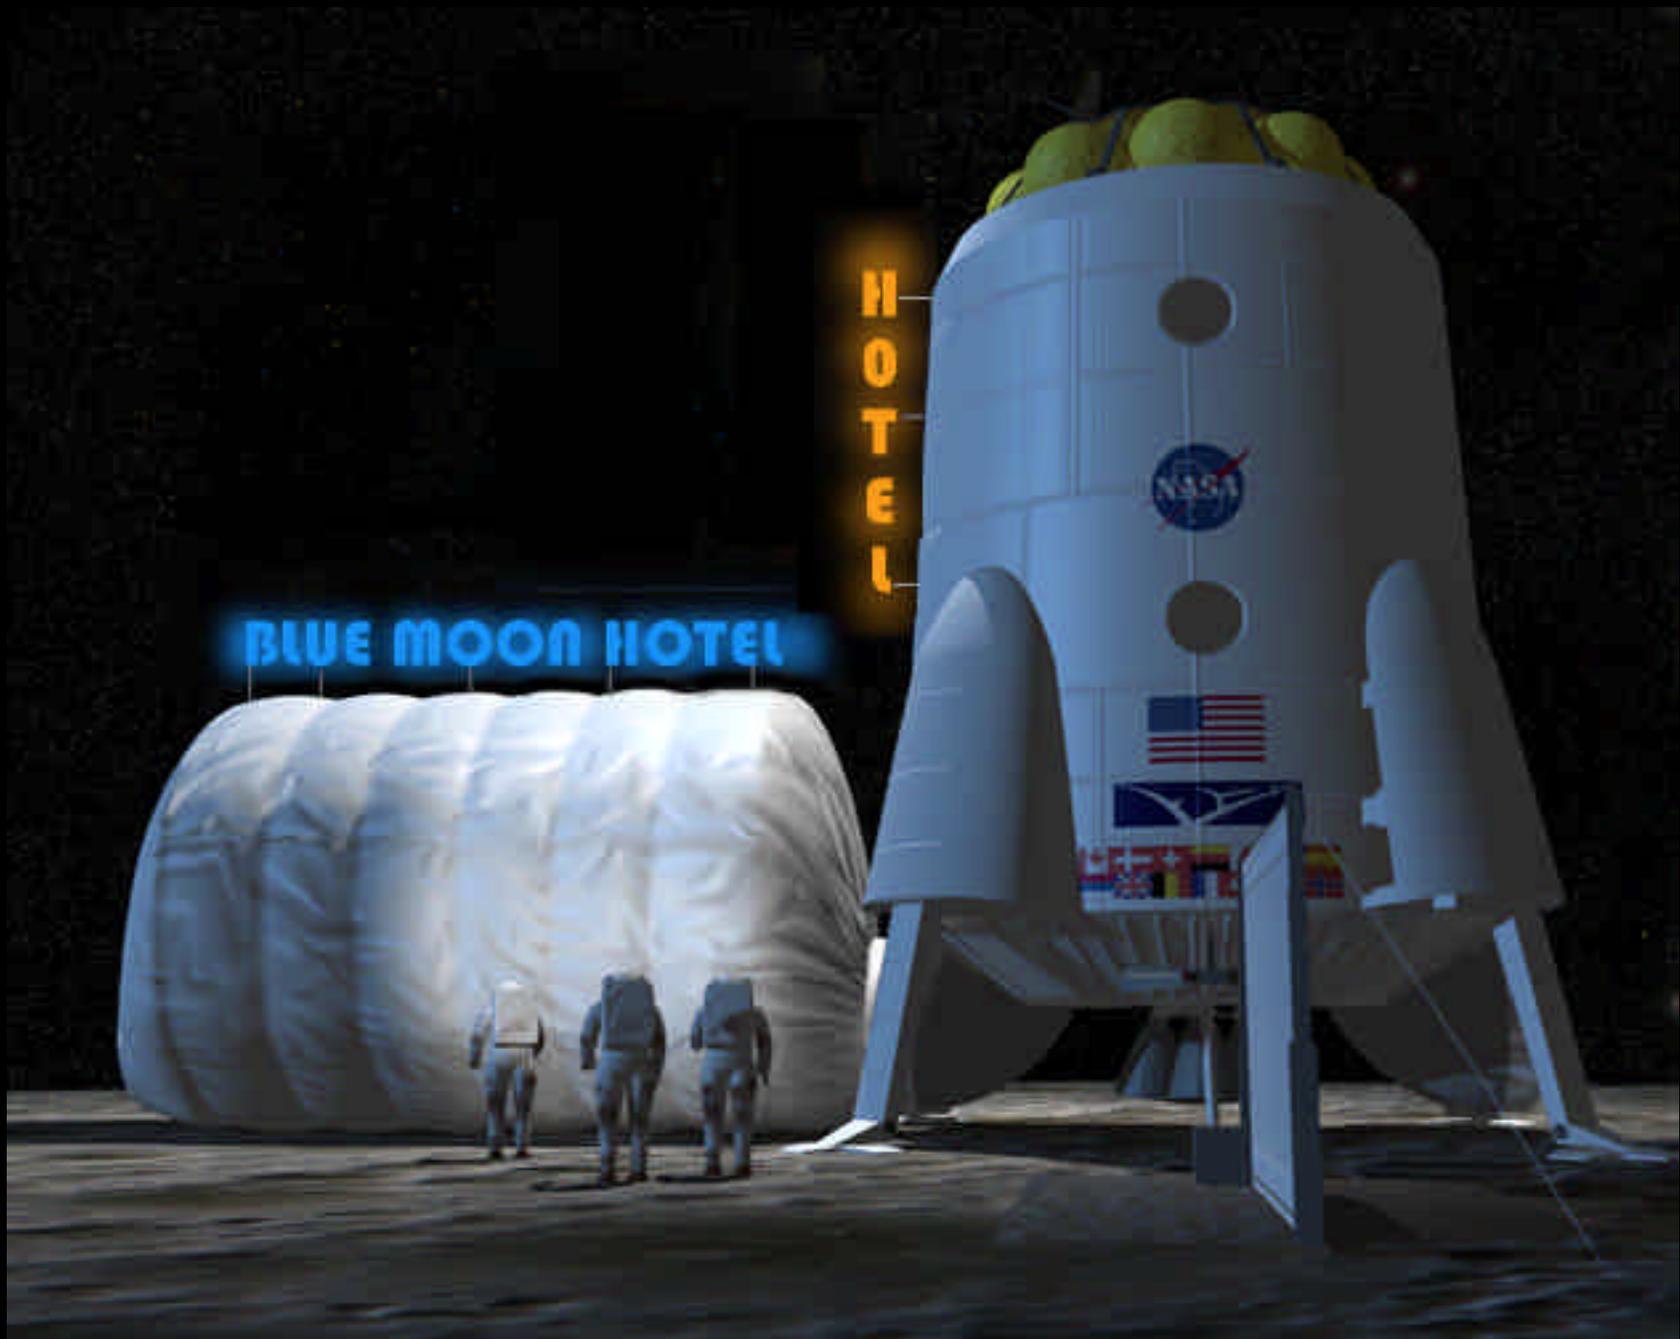

**Commercial Reusable Upper-Stage
provides low-cost access to GEO**

Commercial space transportation that operate from regular runways like today's airlines

Third generation space transportation launch costs @ \$100s per pound to orbit creates business opportunity
