

Presentation guide

HCW

Dear All,

While preparing your presentations, please consider the issues presented below. You are not required to present answers to all of the questions, but you should use them as a guide to build the content of your presentation. Presentations are only five minutes long, so every word counts.

1. Overall Question/Inquiry

What particular aspect of Halloween did you choose to study? Tell us why you chose to do so (your motives). What assumptions did you have on the topic/issue?

2. The Fieldwork Scene

Briefly describe your experience and your observations.

3. Note taking

How did you record your data?

4. Knowledge

What did you learn from your inquiry that you did not know before? What are the most compelling ethnographic examples that you can share? What might be missing? Are there any gaps and omissions in the material that your observation could not fill in?

5. Positioning

Did your assumptions about a particular aspect of Halloween change? If so how did it change? And if not, then why do you think so.

6. Obstacles

What obstacles did you encounter during your research and how do you think those obstacles influence your thinking and your potential paper?

7. Thinking

Based on your fieldwork, what do you think your paper might be about?
