

Assignment Four HCW

Due the day before session 10 at 6pm

Dear all,

The goal of this assignment is to understand the ways in which Foucault and other authors analyze the exercise of power that is being dispersed throughout various spaces in everyday life.

After completing your readings, please list up to five major concepts (i.e. spatial distribution, or body), discussed by Foucault, explain them using your own words and whenever possible provide examples from the readings (Foucault, and Shearing and Stenning). Make sure to elaborate on these concepts. Do not merely define them based on one particular place in a text. The authors take a great deal of time and effort to develop these concepts in a variety of settings and show their complexity.

Good luck,

Manduhai
