

## Assignment 1:

1) Take 20 or more images that show "good light". More detail as to what that means can be found on the OCW site under "Major Assignment: Light".

2) When you're done, pick your 5 favorites and email them to me no later than 9am Monday. Try to resize them to no bigger than 800x600, and no smaller than 400x300, if you can. This is easy using Picasa - in Tools > Options, you can set the size of images you email, and the computer will resize them for you. Picking the "640 pixels" option would be fine. (If you haven't resized before, and your email / photo program won't do it for you, don't worry about it - we'll show you in class. And don't set your camera to take smaller images - always take the biggest you can.)

Picasa is here:

<http://picasa.google.com/>

3) You should try to familiarize yourself with your camera and all it's options as part of this assignment. Be sure, if you see something that you think makes a great image, to take many images of it. Odds are better when you do that one will be perfect - in focus, clear, well exposed, etc.
