

# NMDA receptors and place cells

Today's papers

# How do we find region specific promoters?

- By accident
- By creating a database of expression patterns.

# The Allen brain institute

- <http://www.brainatlas.org/aba/>

# Don't miss

- <http://web.mit.edu/picower/events/symposium.html>

# Questions for next week.

- Wiltgen et al. – What does the hippocampus contribute to contextual fear learning?
- Moita et al. – What is the “trade off” that is necessary when using place cell analysis to study fear memory?
