

## 9.10/9.100 REVIEW QUESTIONS

### Memory - III

1. What is source amnesia?
2. Are there separable neural systems subserving recognition of an item and memory for its frequency?
3. Is working memory monolithic?
4. Does the neural substrate for working memory extend beyond prefrontal cortex?
5. What is the role of the hippocampal region in working memory?
6. Do organizational strategies, when applied to self-ordered searching tasks, reduce the overall load on working memory?
7. What is the role of prefrontal cortex in retrieval operations?
