Local Fire at Broad Falls Middle School Kills Three, Caused by Drone Malfunction

by: Rebekah Huynh

The firefighting drones program was established in the early 2300's, a decade known for its drone innovation. Before then, all fires were put out by firefighters, men who volunteered to put their lives on the line to fight fires and rescue victims. This drone program was seen as a savior to many, as it eliminated the need for risking human lives while still attending to and putting out fires.

However, in last night's fire at Broad Falls Middle School, these drones did not do their job, causing two students and one teacher to perish in the fire. The investigation that followed revealed that a sensor had been tampered with in all the drones. The drones had failed to detect human children as targets that needed to be saved, and simply evacuated the scene.

This tragedy has shocked many, and has caused great distress in the neighboring communities. It also is causing many people to wonder, are we too dependent on technology? Is human supervision still necessary?

Fire Fighting Drone

Have we put too much trust in our machines? Human supervision deemed necessary for future drone missions to prevent oversight.

The Hidden Zebra theory gains momentum

Hidden Zebra Theory Gains Momentum

by: Chris McRiley *(staff)*

After much speculation about Clados Cloning's secret new cloning process, there's finally a theory that people can rally behind. The Hidden Zebra Theory is gaining serious momentum, despite the initial incredulous reactions.

In fact, top researchers and engineers in the cloning field are saying that this theory is highly possible and would explain the success of this cloning process, although it has severe implications. However, they do add that other explanations are also possible. But as of now, no other plausible theories have arisen and Clados Cloning is still reluctant to provide their own. Furthermore, the disappearance of "untrackables" is by definition, unable to be tracked, so officials have no way of disproving this claim. Clados Cloning's silence has only served to raise more suspicion about their cloning process. The supporters of the Hidden Zebra Theory have started openly protesting Clados Cloning, urging police officers to expedite their investigation efforts. They have enough forces to block the entrance gate 24/7. "Who knows what they are doing with all these clones? Who knows how many untrackables have been murdered? They could be making thousands more and no one would have any clue," says protester, Jimmy Lee. *(continued on p. 17)*
