

SP.718 Developing World Prosthetics

Spring 2010

Assignment 4

Problem: What makes a design good or bad for developing countries?

You took a picture of two very different objects or products, one that you believe is a relatively bad design, and one that is a relatively good design for the assignment 2. Design them for people living in develop countries. (Hand sketch is enough) Be careful to choose materials, specify how to manufacture, and estimate the cost. Please also raise any expected problem, when you disseminate them.
