

ESD.342 Spring 2006  
Assignment 1

From the point of view of your main technical expertise, describe for us in 3 minutes

- How do you or skilled people in your field approach and think about problems
- What kinds of problems are considered “hard”
- What assumptions do you make that guide analytical or design thinking or combine to produce a style of methods or outputs
- What kinds of expertise are honored and respected
- What designs are considered good or elegant

In general, this should relate to **systems** in your field, to the extent that you can make this link.

Prepare some slides of your answer.
