

# Class 5 – Project Choice Discussion

- Everyone should have a copy of the **Project System Title Table Handout**
  - Write your (readable) name on the line near the bottom
  - Identify where in the list your “Title” (as shortened in many cases by the faculty) appears
  - Add the following late additions (anyone not appearing)
- In the order shown in the Table, 1 minute presentations (and 1 minute or so of questions and discussions) will be held for each proposed system led by the proposer.
- As the presentations are given, choose which other system proposal you would be willing to work on ..(at least 3 other systems must be so marked)
- You may choose the “All are OK” line at the bottom of the Table but the criteria as shown in the assignment that will be important in choosing effective projects are:

# Project System Choice Criteria

- Why the proposed system is interesting
- What you hope to learn by studying it
- What data sources are you aware of that may help you build a specific model that can be objectively exercised
- What you hope the results of the study will add to our collective knowledge about system architecture

# Other Organizational Items

- The project choice and teams will be posted on the web site by the end of business Friday.
- The UCINET tutorial will be on Tuesday Morning at 8AM (hopefully here or next door)
- Assignment #3 will be posted by the end of today
