

# *The Millennium Global Village-Network: Helping to Achieve the MDGs by Improving Quality, Access and Efficiency*

Andrew S. Kanter<sup>a,b,c</sup>, Patricia Mechael<sup>a</sup>, Matt Berg<sup>a</sup>  
Columbia International eHealth Laboratory (CIEL)

<sup>a</sup> Millennium Villages Project, Earth Institute, Columbia University, New York, USA

<sup>b</sup> Department of Biomedical Informatics, Columbia University, New York, NY, USA

<sup>c</sup> Department of Epidemiology, Mailman School of Public Health, Columbia University,  
New York, NY, USA

# Agenda

- ➊ Millennium Villages Project Overview
- ➋ The Problem
- ➌ MGV-Net Solution: OpenMRS/ChildCount+
- ➍ Terminology/Enterprise Architecture
- ➎ OASIS II Evaluation and Malaria in Uganda

# *Millennium Villages Project*

- ❊ Partnership between the Earth Institute Columbia University, UNDP, Millennium Promise and national governments.
- ❊ Primarily operates in 10 countries in 14 agro-ecological zones in Sub-Saharan Africa
- ❊ Integrated development at \$120 pc/y

# *Millennium Villages*

- ✪ Koraro, Ethiopia
- ✪ Bonsaaso, Ghana
- ✪ Dertu, Kenya
- ✪ Sauri, Kenya
- ✪ Gumalira, Malawi
- ✪ Mwandama, Malawi
- ✪ Tiby, Mali
- ✪ Timbuktu, Mali
- ✪ Ikaram, Nigeria
- ✪ Pampaida, Nigeria
- ✪ Mayange, Rwanda
- ✪ Potou, Senegal
- ✪ Mbola, Tanzania
- ✪ Ruhiira, Uganda

# *Role of Health Information*

- ⊕ Three of eight MDGs are health-related
- ⊕ MVP establishes one clinic per 5000 people
- ⊕ 1 CHW for 100 HH
- ⊕ Improve care
- ⊕ Assess impact and effectiveness of program

Monthly Serial Number	Registration number		New Patient					Seen within 4 weeks of appointment	Treatment / Advice	Service fee/ Card charge

 ACADEMIC MODEL PROVIDING ACCESS TO HEALTHCARE

Mobile Technology for Community Health (MoTeCH)

# *OASIS II Study-Evaluating Impact*

The proposed research systematically evaluates the impact of all MGV-Net components (e.g. ChildCount+; OpenMRS) on various aspects of the healthcare delivery system including:

- ⊕ service coverage;
- ⊕ quality of services;
- ⊕ early detection, referral, and treatment of danger signs
- ⊕ morbidity and mortality
- ⊕ management of resources (human, financial, etc)

# *OASIS II Study Design*

- ⊕ Mixed methods
- ⊕ Retrospective Case-Control- exposure to on-time CHW visits
- ⊕ Repeated Measures with & without MGV-Net
- ⊕ Action Research Component
- ⊕ Repeated Measures of Paper vs. SMS

# *Malaria in Uganda- Action Research*

Key measure of success	Pre-intervention
Patients treated who were not tested or tested negative	<b>90%</b>
Patients treated who tested negative	<b>48%</b>
Patients treated who tested positive	<b>10%</b>

# *Malaria in Uganda- Action Research*

Key measure of success	Pre-intervention	Post-intervention
Patients treated who were not tested or tested negative	<b>90%</b>	<b>32%</b>
Patients treated who tested negative	<b>48%</b>	<b>12% in Q1</b> <b>18% in Q4</b>
Patients treated who tested positive	<b>10%</b>	<b>30% in Q1</b> <b>58% in Q4</b>

# *Challenges and Lessons Learned*

- ⊕ Human capacity
- ⊕ Clinician engagement
- ⊕ Reliable electricity, computers, connectivity
- ⊕ Need interoperability
- ⊕ Need maturity model
- ⊕ Gov't policies

# *Shared Terminology and Resources*
