

## Problem Set #5

---

The fifth problem set is due next Wednesday March 16th at 12 noon.

- Read [the article on disjunction](#) by R.E. Jennings in the *Stanford Encyclopedia of Philosophy*.
- Read especially carefully the section on:  
“The Myth of *Vel* and *Aut*”. (<http://plato.stanford.edu/entries/disjunction/#7>)
- Report in your own words the central argument that Jennings makes against the claim that Latin *aut* unambiguously conveyed exclusive disjunction.
- Assess whether Jennings’ argument could be used to make the same point about English *or*.

Expected length: about one page.
