stiff vocal folds	+		=					+

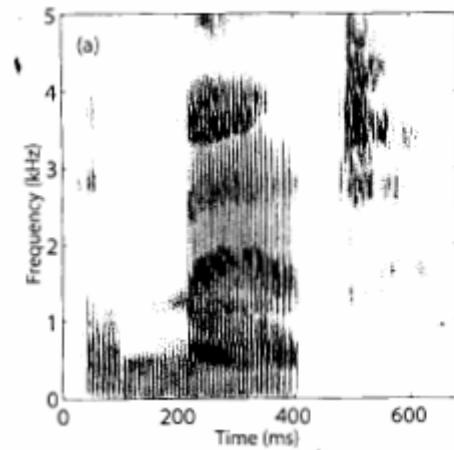

FEATURES OF SOME SEGMENTS

Table 3. Listing of the features for some vowels and glides in English.

	i	ɛ	æ	ɑ	ʌ	u	w	j	h	ɑj
high	+	-	-	-	-	+	+	+		-+
low	-	-	+	+	-	-	-	-		+-
back	-	-	-	+	+	+	+	-		+-
round					-	-	+	+		
tense	+	-			-	+	+	+		+
spread glottis							-	-		+

Table 2. Listing of articulator-free features, articulators, and articulator-bound features for some consonants in English.

LANDMARKS

a mat

a wash

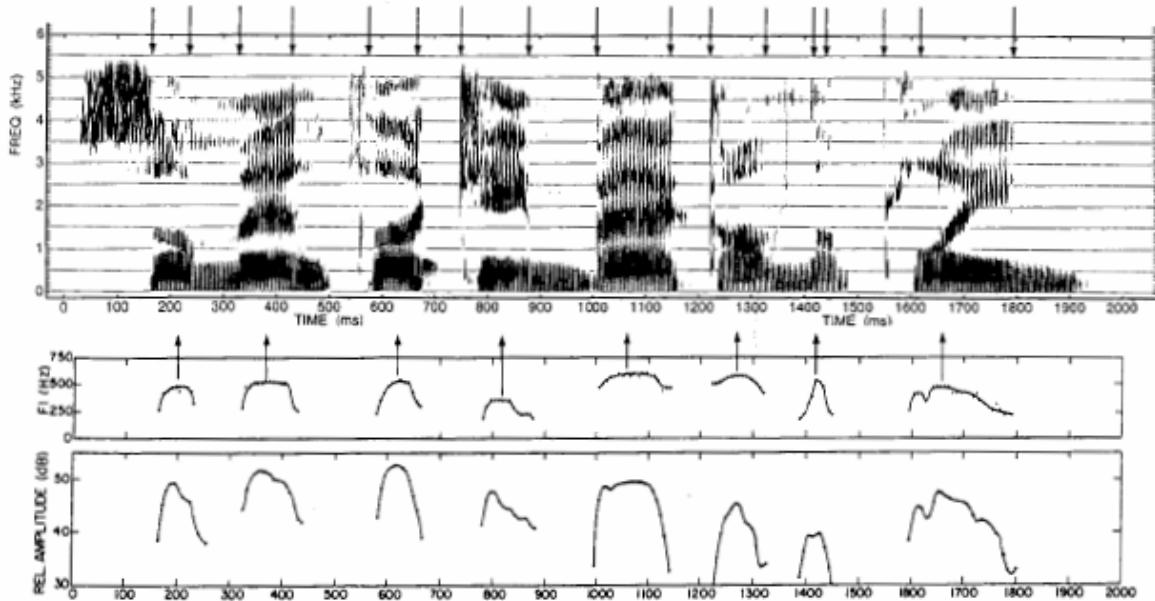

Figure 5.1 Shown at the top is a spectrogram of the sentence *Samantha came back on the plane*, produced by an adult male speaker. The plot immediately below the spectrogram gives the frequency of F_1 vs. time during the vocalic regions, measured at 7.5-ms intervals. At the bottom is a plot of the relative amplitude of the first-formant prominence during the vocalic regions. Each point on this amplitude plot and on the plot of frequency of F_1 is measured from a spectrum which is obtained by averaging a 10-ms sequence of spectra, each of which is calculated using a 0.4-ms Hamming window. The arrows below the spectrogram indicate vocalic landmarks and the arrows at the top identify consonantal landmarks. See text.

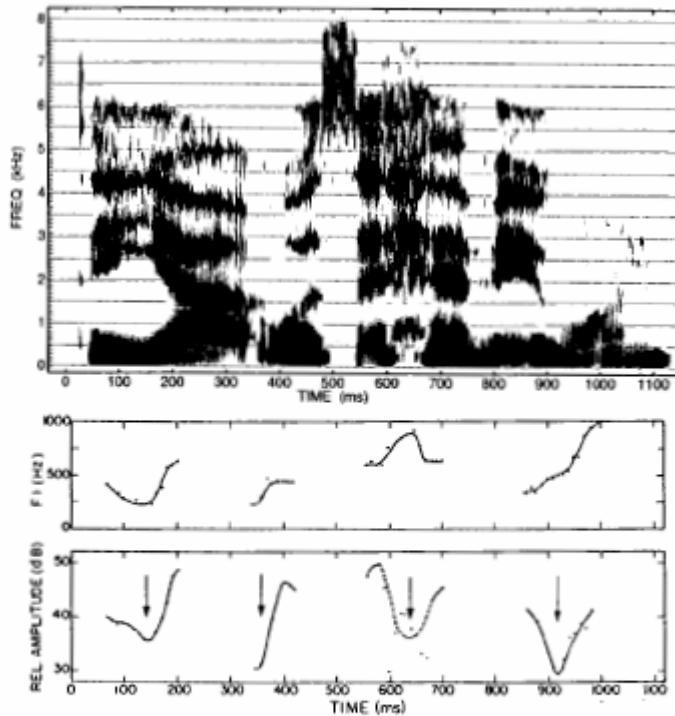

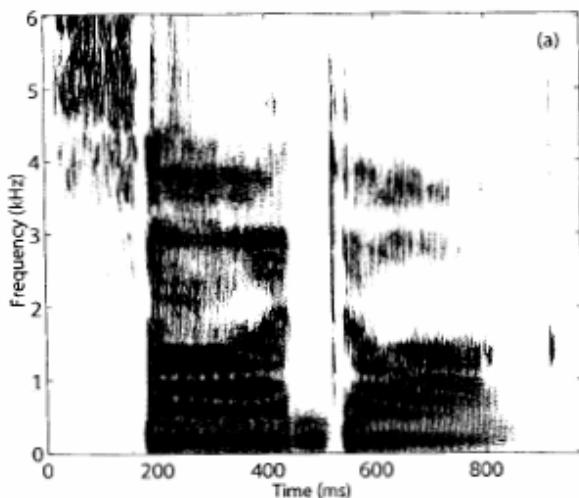

Figure 5.2. The spectrogram is the sentence *The yacht was a heavy one*, produced by a female speaker, illustrating acoustic attributes of glides. The first-formant frequency in the vicinity of the glides is shown immediately below the spectrogram. The plot at the bottom is the amplitude of the F_1 prominence. The arrows at the amplitude minima for the glides identify the glide landmarks. The irregularities in the amplitude for /h/ are smoothed with the dashed line. Measurements are made at 10-ms intervals using the procedures described in the legend for figure 5.1.

SOME PROBLEMS WITH FINDING LANDMARKS

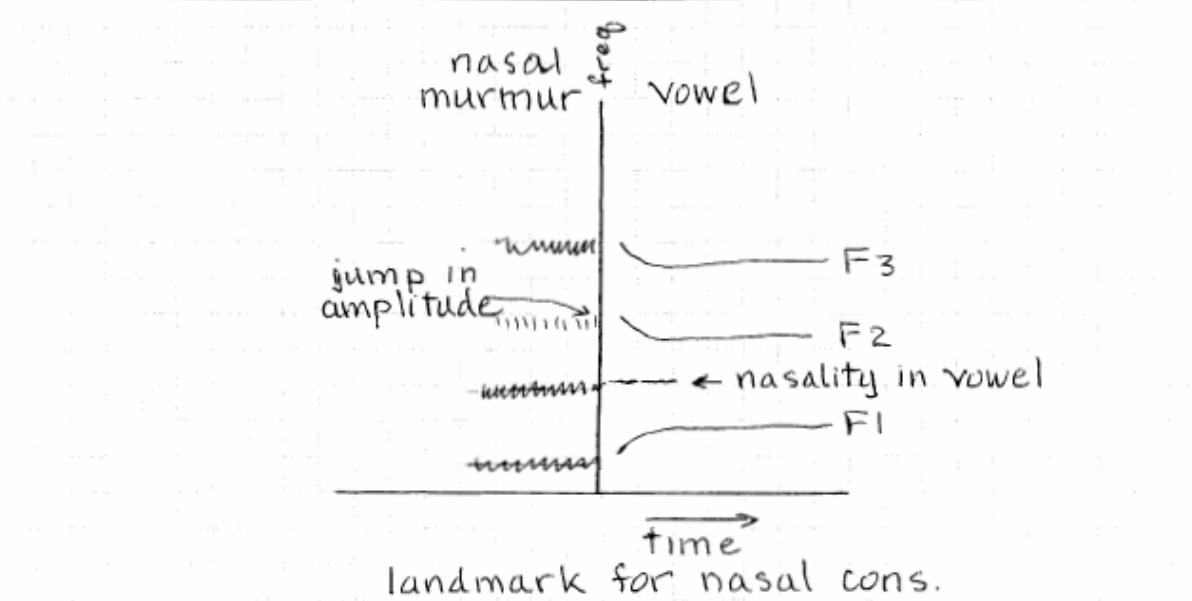

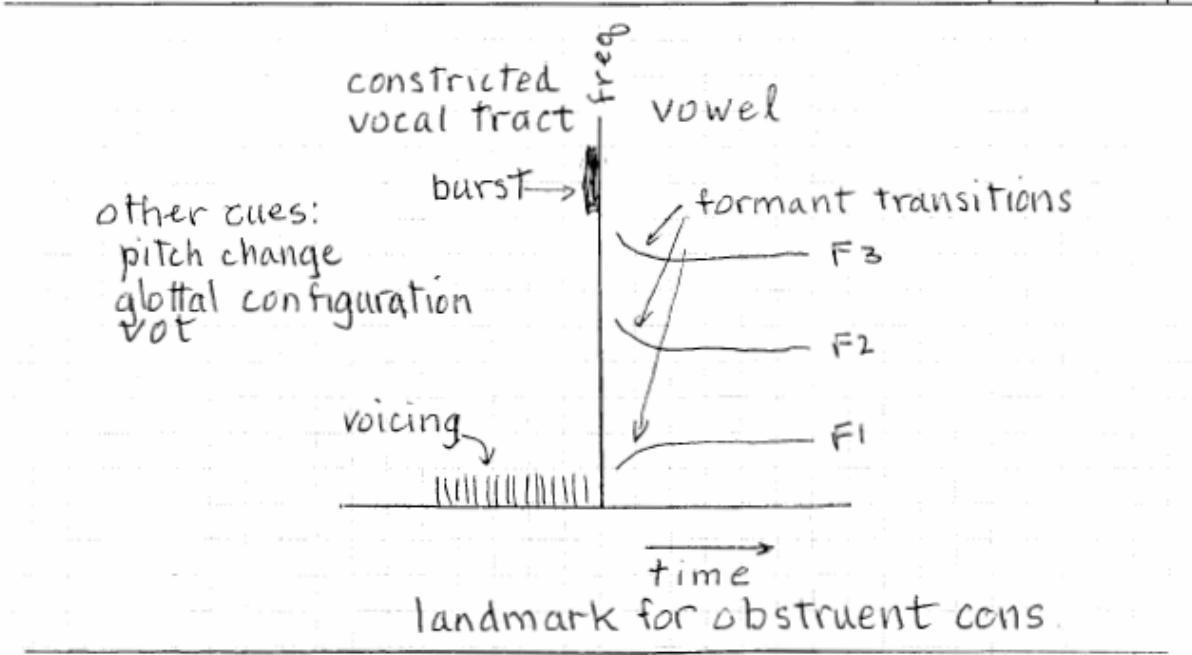

saw a dog

sudden

LOOKING FOR CUES TO FEATURES IN THE VICINITY OF LANDMARKS

MORE ON LOOKING AROUND LANDMARKS

The sentence is **Last Monday we sang at breakfast.**

Figure out where in the sentence these excerpts come from.

Spectrograms of short segments abstracted from the sentence are shown in the figure below.
