

Hello again!

One reason to use Baker as our primary textbook is that it includes access to the online site <http://www.oldenglishaerobics.net>, which you can use to practice various skill-sets and test your understanding of the grammatical principles we're discussing.

Once you're signed up, I encourage you to go to "Workout Room" and play around with some of the exercises—especially those about case, to see how well you've internalized the material from last week. Once you've studied your pronoun paradigms, you can also use the exercises to test yourself on those. I've played around with the site, and it looks pretty cool ... I wish I'd had something similar when I learned OE!!

Enjoy!

Prof. Bahr
