

Can Solutions have a Local Maximum?

Quiz: Can Solutions have a Local Maximum?.

Can solutions of autonomous equations have a strict local maximum? (For a function $f(t)$ a strict local maximum at time $t = a$ means $f(a)$ is larger than any nearby values of $f(t)$. Graphically, it is at the top of a hill.)

Choices:

- a) Yes.
- b) No.

Pick what you think is the correct choice and then look at the answer.
