

## **17.922 IAP 13**

### **Activity 9**

Students will meet again in their groups and firm up the ideas for either an installation or a project. The installation is generally broken up into several different pieces or ideas.

Each group will nominate a leader. The leader is responsible for delegating duties among group members, coordinating with the main facilitator and the student leader to see that everything is completed on time, creating a budget for their project/installation piece, ordering materials, and checking in with the main facilitator during the next week and a half.

At this point materials have been suggested, each group has designed their project or installation, and preliminary budgets have been handed to the main facilitator for approval.
