

15.010/15.011: Tips for Homework Solutions & Exams

Bear in mind the following as you work on the 15.010/15.011 problem sets and exams.

1. Clearly explain your thought process:
 - show sufficient detail in calculations for the grader to see every step
 - define important economic concepts (on which the answer depends) when answering a true-false question
 - show important steps in solving a problem.
2. Your answer is not complete if you do not indicate units in the final result.
3. Make sure that your answers are legible.
4. Hand written answers are fine.
