Communications & Connectivity Among Information Systems

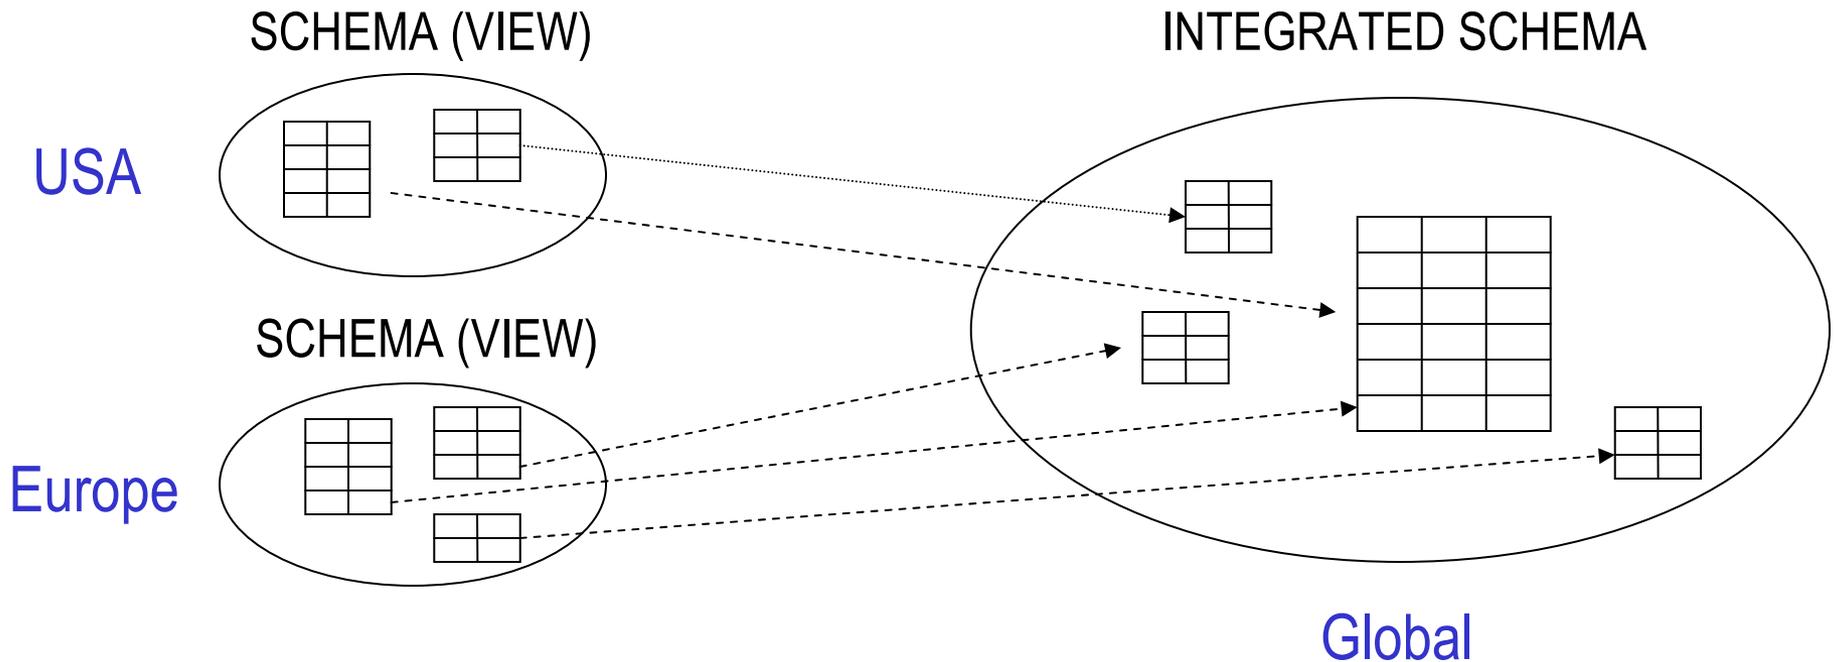

Spring 2002

Lecture 16

***SCHEMA INTEGRATION
AMONG DATABASES***

SCHEMA INTEGRATION

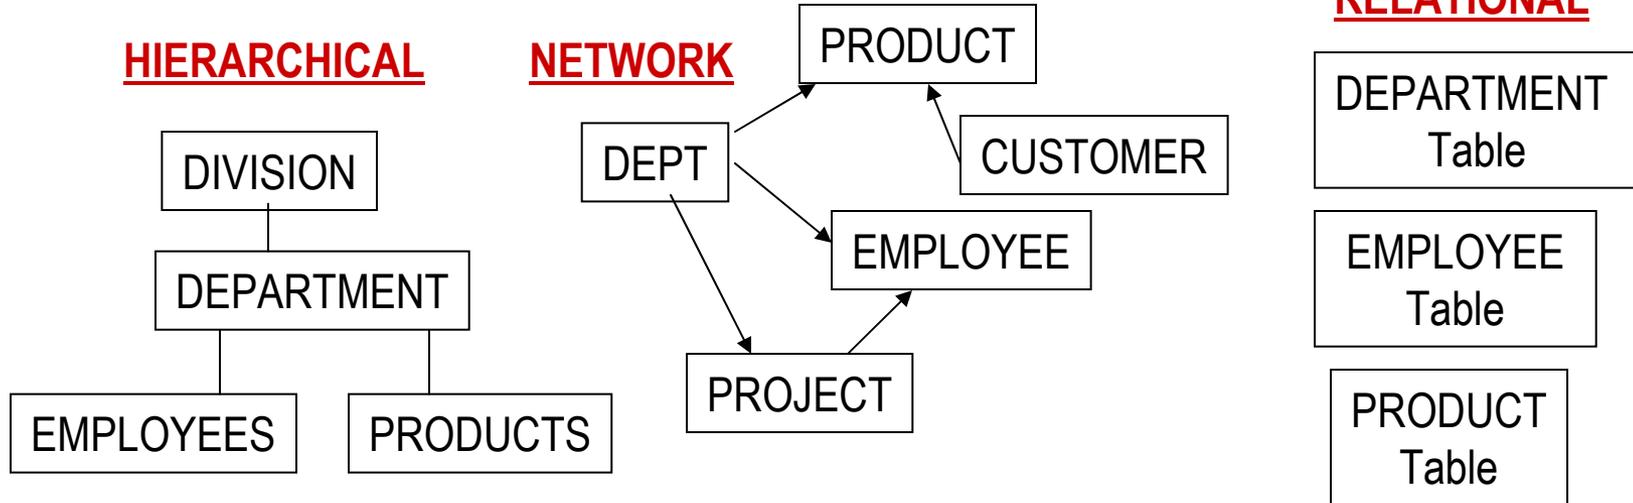

- PURPOSES FOR SCHEMA / VIEW INTEGRATION

- NEW DATABASE DESIGN: MERGE MULTIPLE PEOPLE'S VIEWS
- DATABASE REDESIGN: MERGE MULTIPLE EXISTING DB'S TO NEW DB
- DATA WAREHOUSE: CREATE INTEGRATED SCHEMA / DATABASE
- INTEGRATED VIEW FOR DISTRIBUTED HETEROGENEOUS DBMS

EVOLUTION OF CONCEPTUAL DATABASE DESIGN

• TRADITIONAL DATA MODELS

• SEMANTICALLY -- RICHER DATA MODELS

- ENTITY-RELATIONSHIP (ER) MODEL
- SEMANTIC DATA MODEL
- OBJECT-ORIENTED (OO) DATA MODEL
- OBJECT-RELATIONAL (OR) DATA MODEL

• “CONCEPTUAL” DATABASE DESIGN

- LEADS TO “CONCEPTUAL SCHEMA”
- AIDS INTEGRATION (“SCHEMA INTEGRATION”)

PROCESS OF SCHEMA INTEGRATION

- DATA -- AN AUTONOMOUS RESOURCE
- NEED TO CAPTURE “MEANING” OF DATA
- DESIRE “ENTERPRISE-WIDE” VIEW OF DATA

TERMINOLOGY

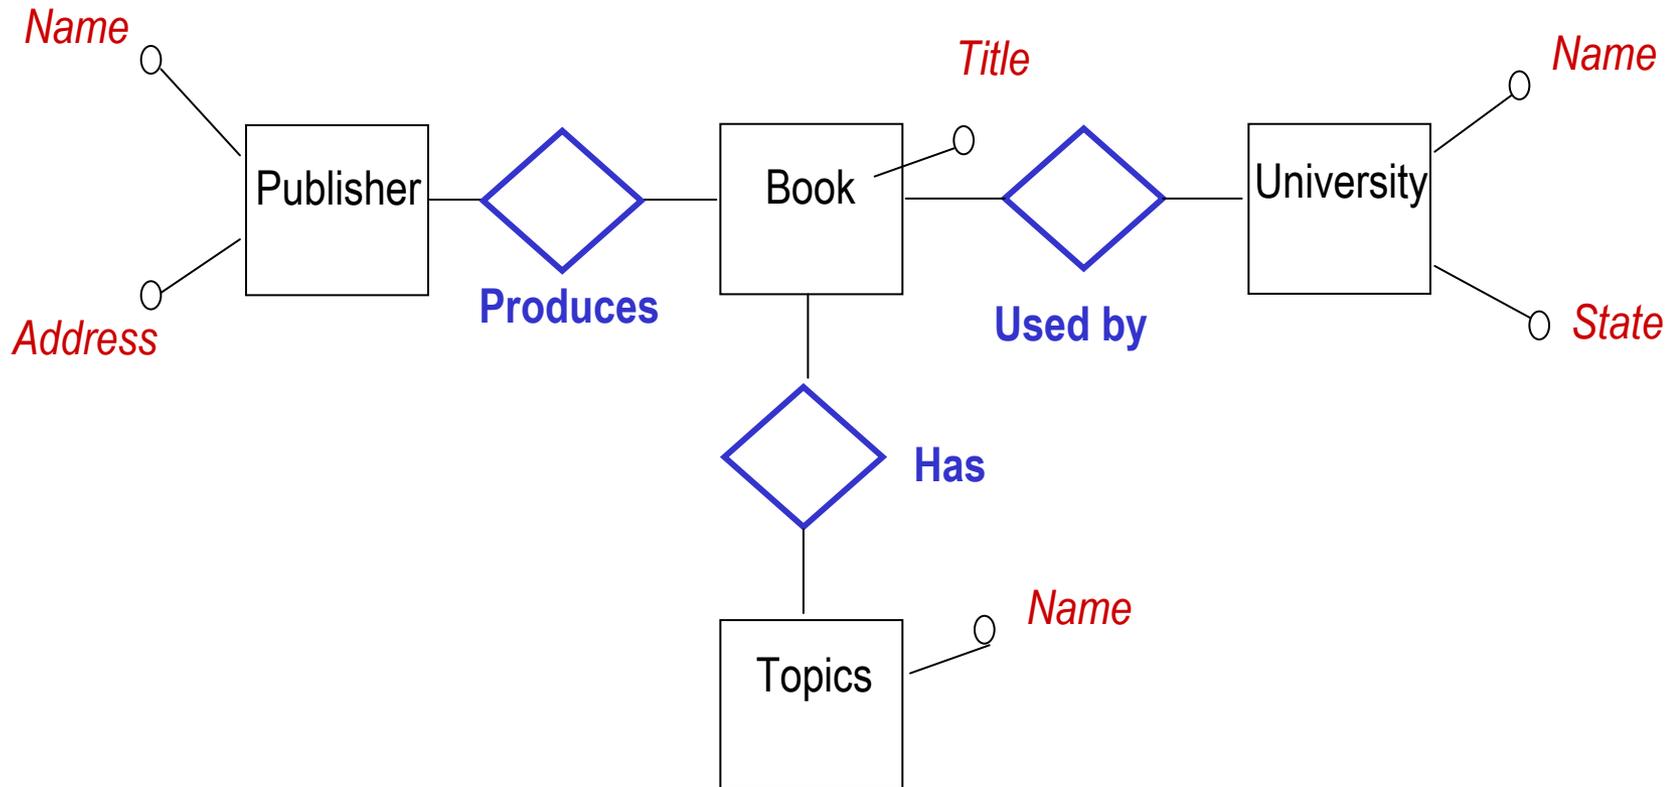

- **SCHEMA INTEGRATION**
 - COMPONENT SCHEMA
 - INTEGRATED SCHEMA
- **VIEW INTEGRATION**
 - USER VIEW
 - CONCEPTUAL VIEW
- **DATABASE INTEGRATION**
 - LOCAL SCHEMA
 - GLOBAL SCHEMA

EXAMPLE

- TWO SCHEMAS DEVELOPED BY TWO GROUPS
 - BOTH FOCUS ON BOOKS/PUBLICATIONS

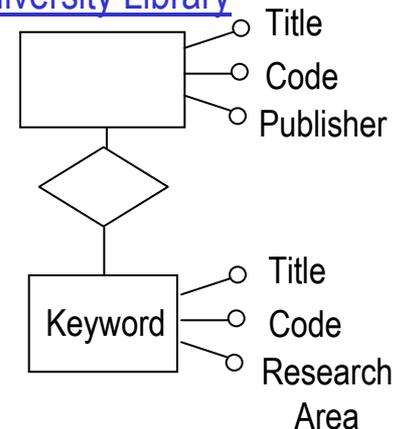

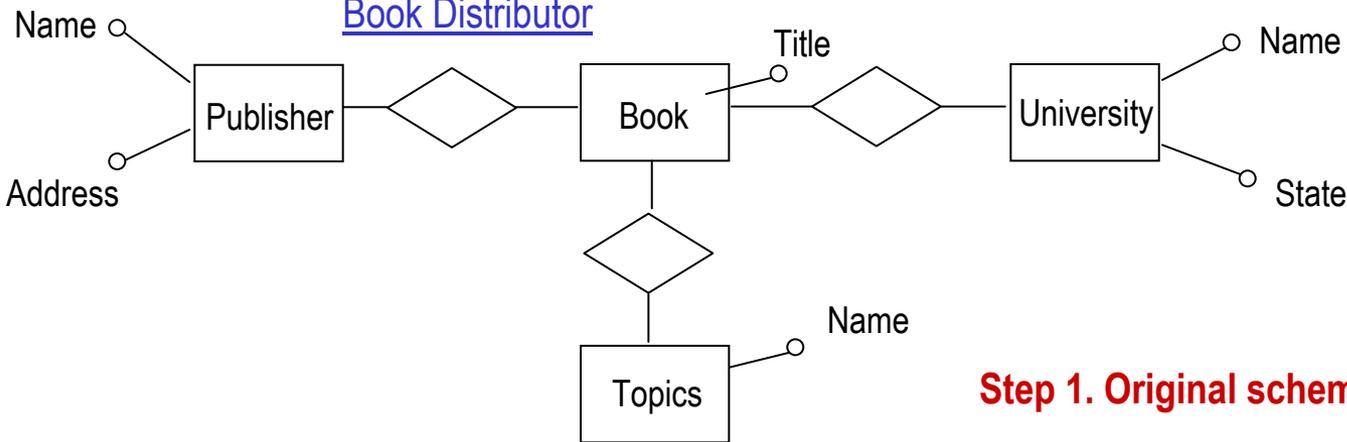

ENTITY-RELATION (ER) DIAGRAM – For Book Distributor

- ENTITIES
- RELATIONSHIPS
- *ATTRIBUTES*

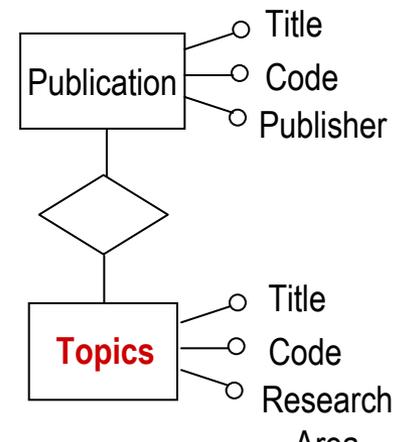

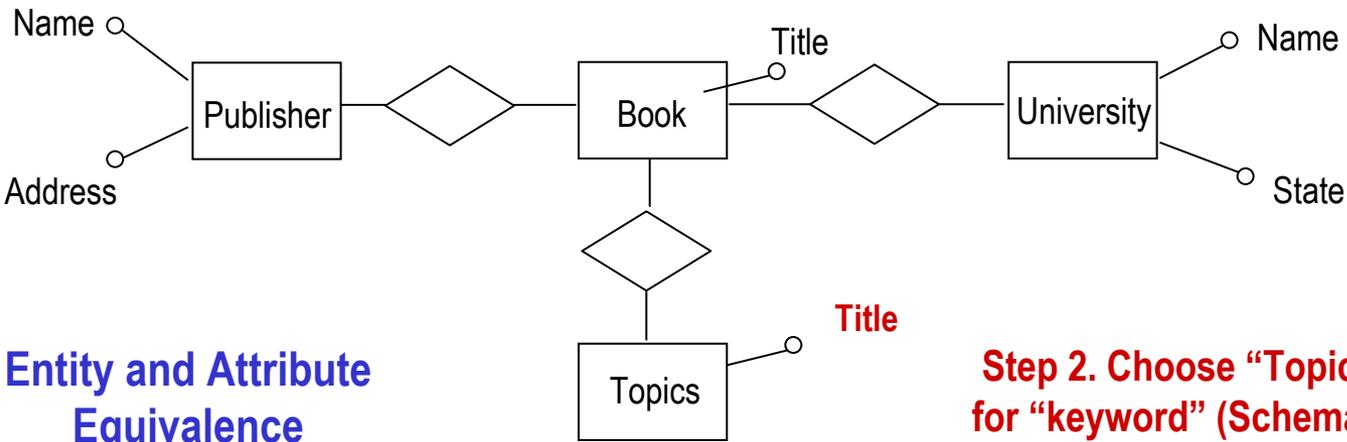

Book Distributor

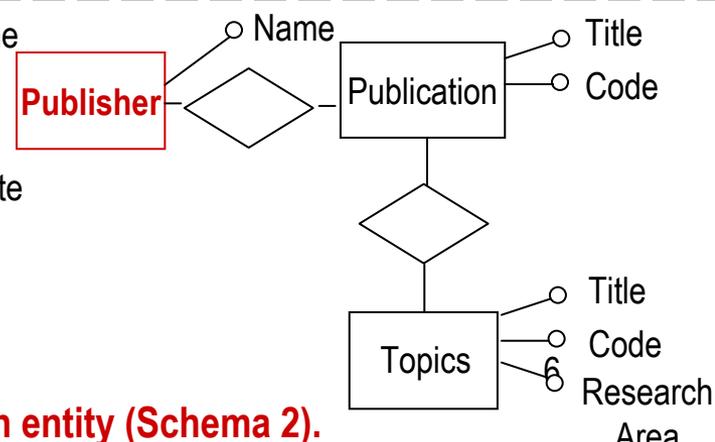

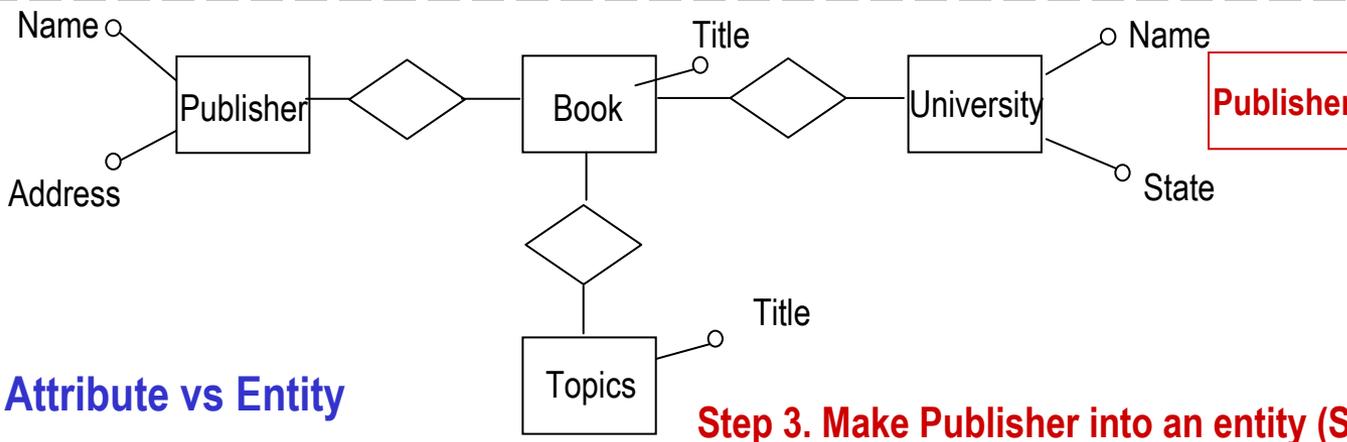

University Library

Step 1. Original schemas

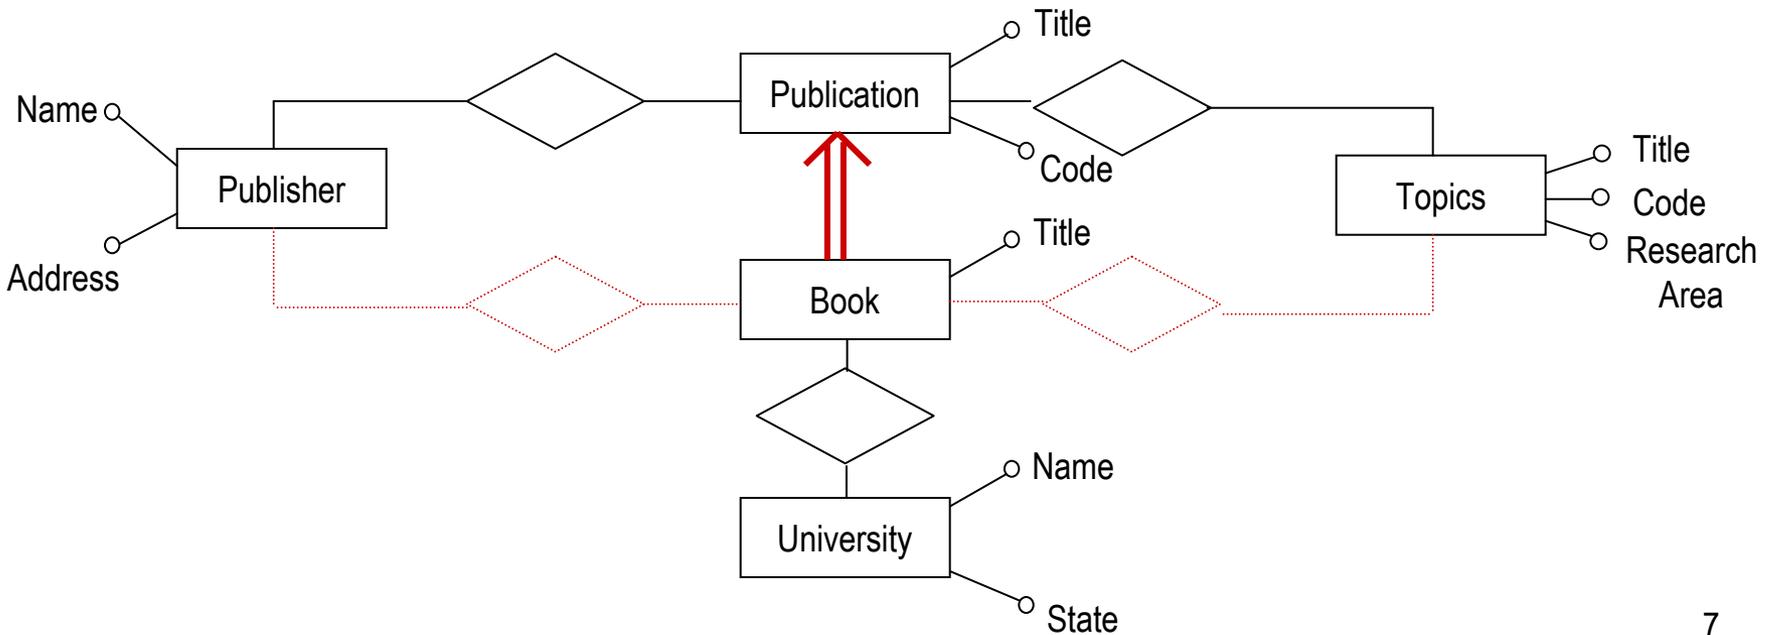

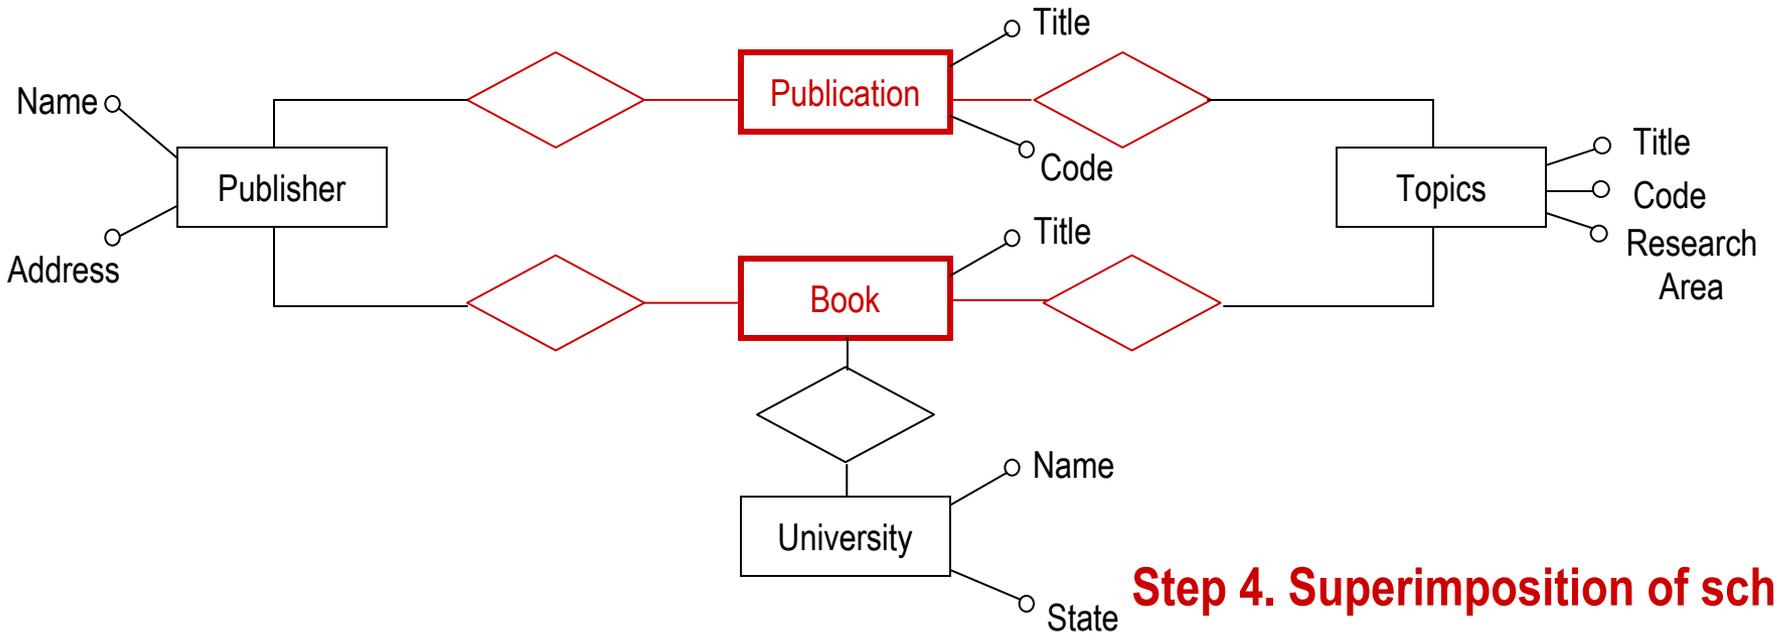

Step 2. Choose "Topics" for "keyword" (Schema 2).

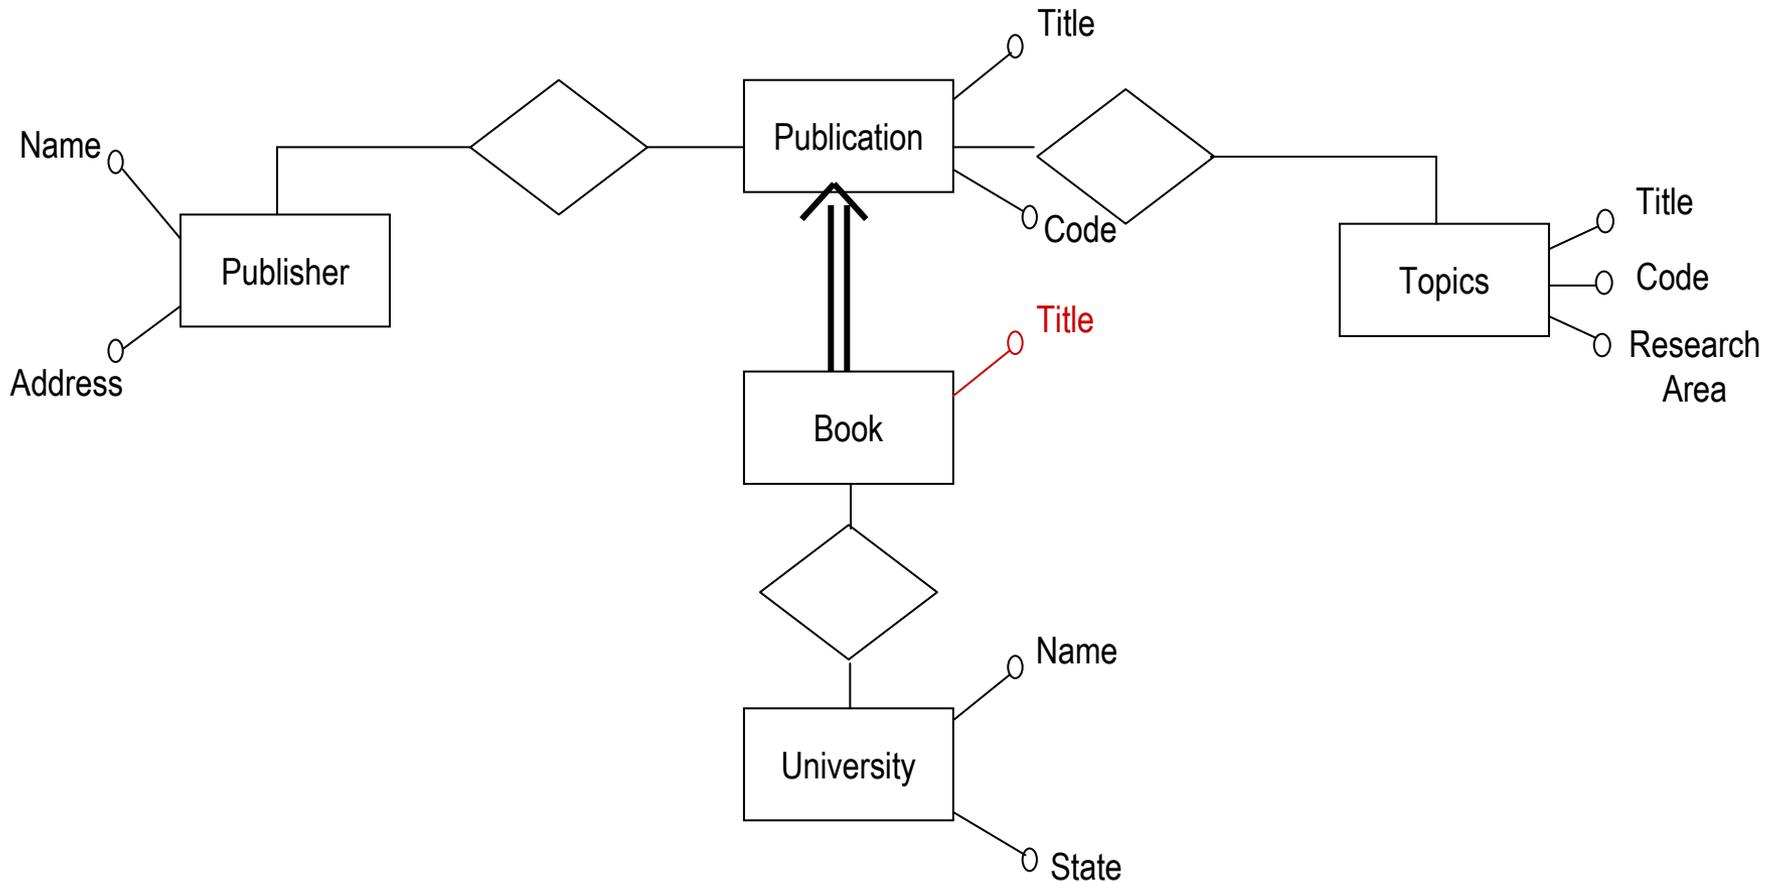

Step 3. Make Publisher into an entity (Schema 2).

Entity and Attribute Equivalence

Attribute vs Entity

Step 6. Drop the properties of Book common to Publication

CAUSES OF DIFFERENCES

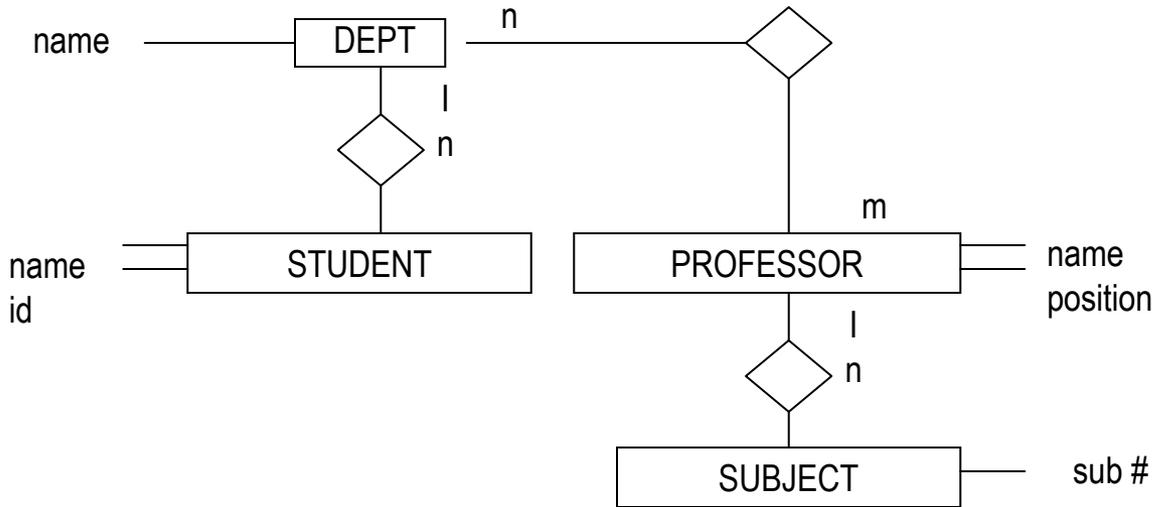

- DIFFERENT PERSPECTIVES
 - DIFFERENT NAME FOR SAME CONCEPT
 - INTERVENING STEPS
 - EMPLOYEE-DEPARTMENT
 - EMPLOYEE-PROJECT-DEPARTMENT
- EQUIVALENCE AMONG CONSTRUCTS
 - MODEL AS ATTRIBUTE OR ENTITY (E.G., PUBLISHER)
- INCOMPATIBLE DESIGN SPECIFICATIONS
 - RELATIONSHIP DIFFERENCES
(E.G., 1:N VS. N:M)

SOME EXAMPLES

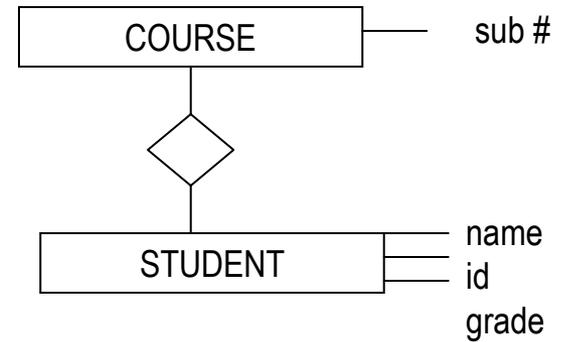

- NAMING CONFLICTS
 - **HOMONYMS:** SAME NAME, DIFFERENT CONCEPT
E.G., EQUIPMENT
E.G., “SIZE” OF DRESS = 1 NUMBER, “SIZE” OF PANTS = 2 NUMBERS)
 - **SYNONYMS:** SAME CONCEPT, DIFFERENT NAMES
E.G., CLIENT, CUSTOMER, PATIENT, ...
- STRUCTURAL CONFLICTS
 - **TYPE:** ENTITY VS. ATTRIBUTE (E.G., PUBLISHER)
 - **DEPENDENCY:** 1:1 VS. N:M (E.G., HUSBAND: WIFE)
 - **KEY:** ALTERNATE WAYS TO IDENTIFY ENTITY (E.G., SS# VS. EMP#)
 - **BEHAVIORAL:** DIFFERENT INSERTION/DELETION POLICIES
(E.G., CAN YOU HAVE DEPARTMENT WITH NO EMPLOYEES?)

EXAMPLE SCHEMAS TO BE INTEGRATED:

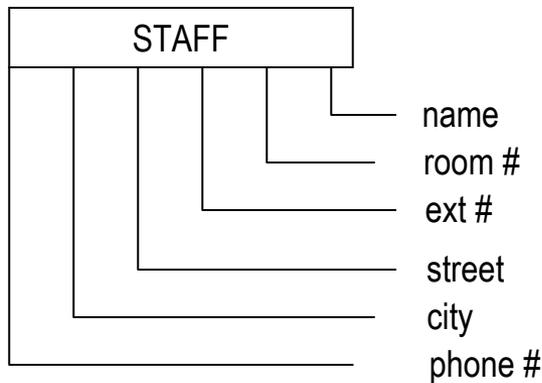

Departmental database

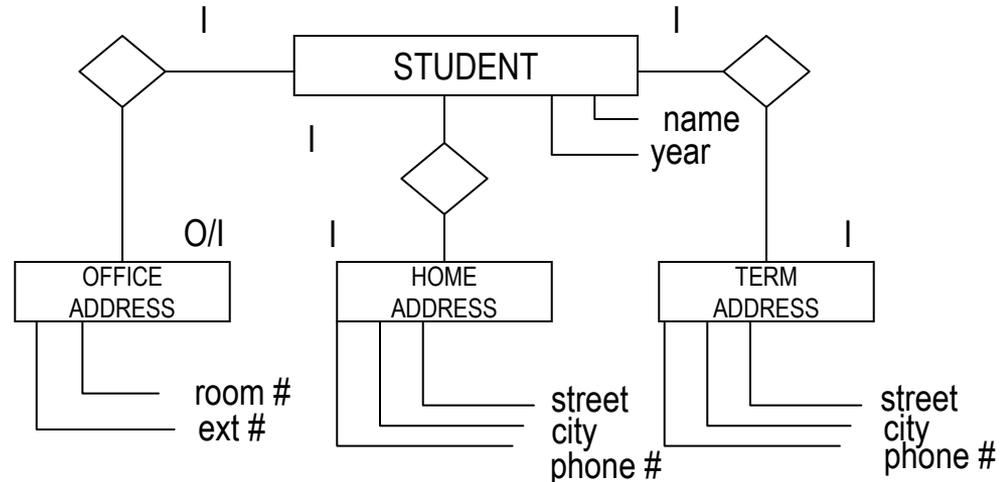

Registrar's database

Staff Telephone directory

Student Telephone directory

INTEGRATED SCHEMA: (an exercise for the reader)

SUMMARY

- INCREASING NEED TO PROVIDE AN INTEGRATED GLOBAL VIEW OF AN ORGANIZATION'S INFORMATION
 - AND SOMETIMES RELATED ORGANIZATIONS (CUSTOMERS / SUPPLIER)
- AN IMPORTANT STEP IS THE CREATION OF A GLOBAL SCHEMA
 - INTEGRATES SEPARATE SCHEMAS
 - CONTAINS ALL THE CRITICAL INFORMATION NEEDED
