

GlobalHealth Lab
Welcome back!

Spring 2013

Anjali Sastry
and colleagues

Plan for today

- your work makes a difference: host reflections on past experience
- finalization checklist
- debriefing!

Plan for today

- Five minutes in teams to finalize preparation for your 5-minute briefing:
 - *Categorize*: What was your project about? (Use our business school language when describing the photo!)
 - *Surprise*: What surprised you in the field?
 - *Wise*: What is something you are really glad you did, either before you left or else while you were on site?
- Coming up:
 - Great guests next week (room change)
 - Mentor meetings to finalize plans
 - **WedUps are required!**

3 team questions, 7 minutes

Categorize

What type of problem(s) were at the heart of your project? Use terms that define the kinds of work MBAs typically do—think of how you'd explain in a management consulting interview.

Surprise

What was the most unexpected part of your entire experience? [*could be something pleasant—or not so much*]

Wise, or wish you did/glad you did

What did you most wish you had with you, or had prepared or done beforehand? *Alternatively*: what one thing were you most grateful that you did have with you or what work were you most glad that you had already done to prepare?
