

# The Advancement of the BID Movement

- BIDs in the United States
- Context (Historic, Political, Economic)
- The Emergence of the BID in Philadelphia
- Center City District
- Other BIDs in Philadelphia
- State Enabling Legislation (*comparative analysis*)
- Empirical Work on BIDs

# Empirical Work on BIDs

## STUDY ONE

- Do BIDs services impact crime patterns?

## STUDY TWO

- If so, do BID services push criminal activity to adjacent neighborhoods?

# Research Design

- **Study One**

- **Method: Regression Analysis**

- **Research Questions:**

**Do BID services discourage crime (clusters)?**

**Data Sources: Crime (1998 & 1999), Cartographic, Census, etc.**

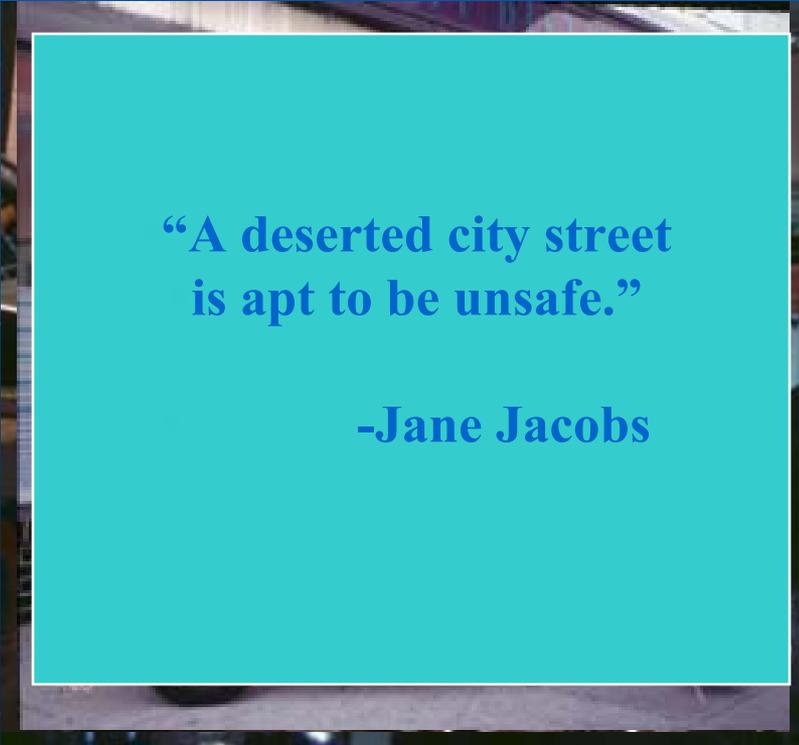

*Property = Burglary, Theft, Auto Theft*

*Violent = Rape, Robbery, Aggravated Assault*

- **Related Research: Kelling, Jacobs, Knox and Mantel**

# Rationale/Context

BIDs focus on “clean and safe” by...

“A deserted city street  
is apt to be unsafe.”

-Jane Jacobs

- enhancing *informal* surveillance
- enhancing *formal* surveillance

# Context

- **City of Philadelphia**
- **Integrated Municipal GIS**
- **No Data Layer for 9 BIDs**
- **Primary Data Collection - Surveys and Interviews**

# Crime Hot Spots

**Spatial Clusters**  
(Area, Grid, and Point)

**Space-time Clusters**  
(Knox, Mantel, and K-function)

# Customized GIS

## Conceptual Framework

- A new point-level method of analysis
- Simultaneously considers space and time
- Captures information about how a pattern grows

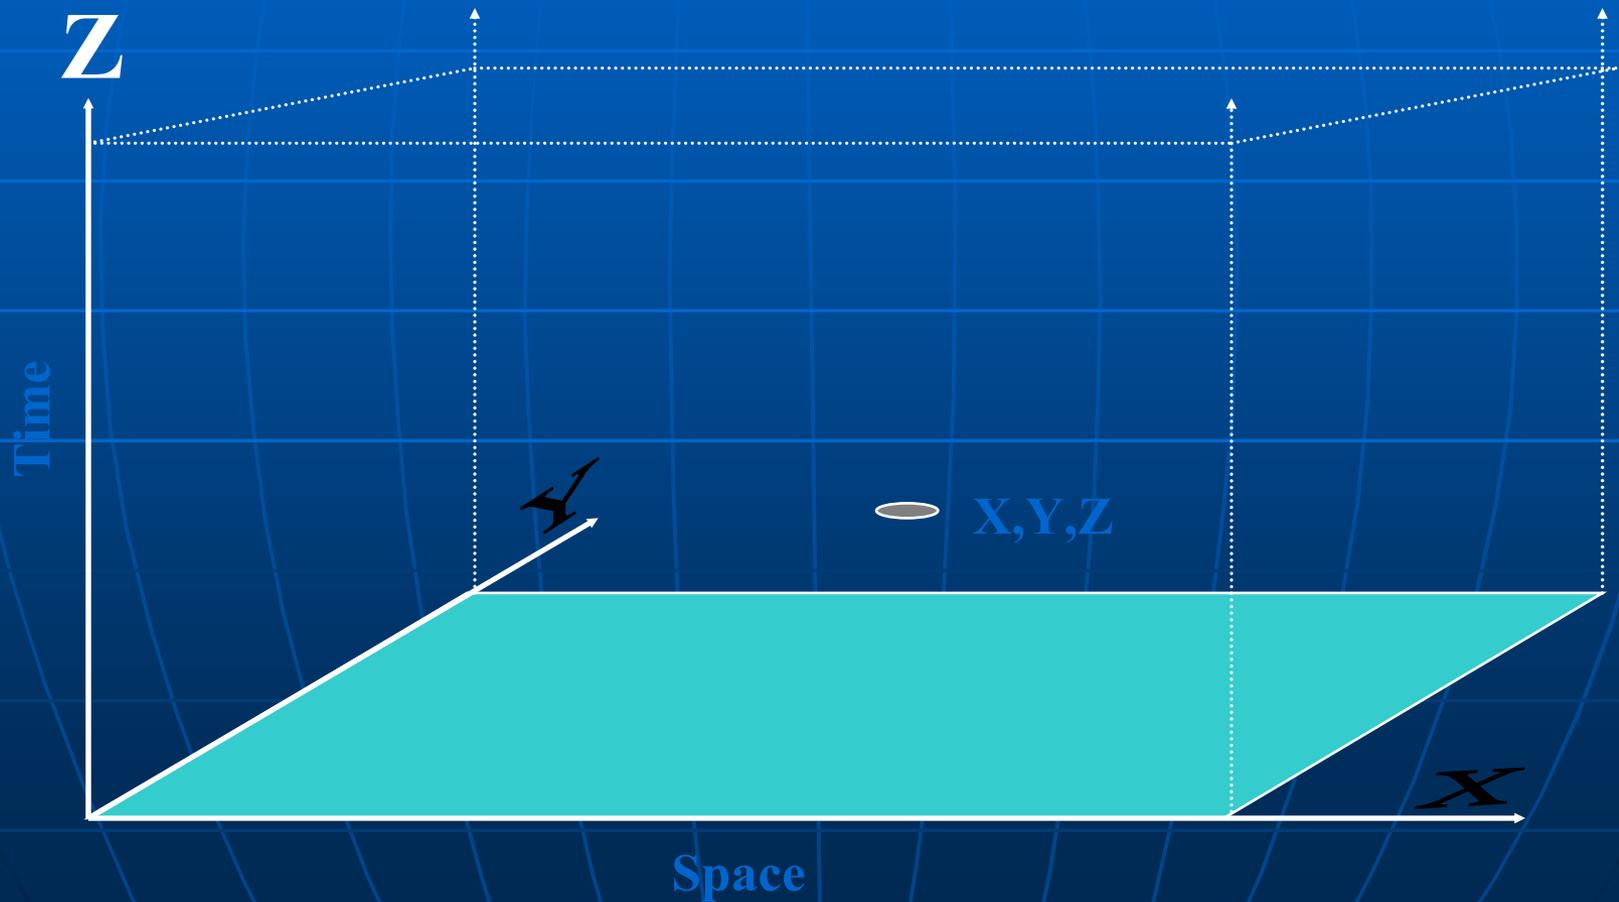

## Operational Framework

- Unit of analysis is the individual crime event
- GIS calculates a cluster value (*using Avenue*)
- Analyst determines spatial and temporal parameters
- Treats each incident as if it initiated the cluster
- Excludes those crimes already counted

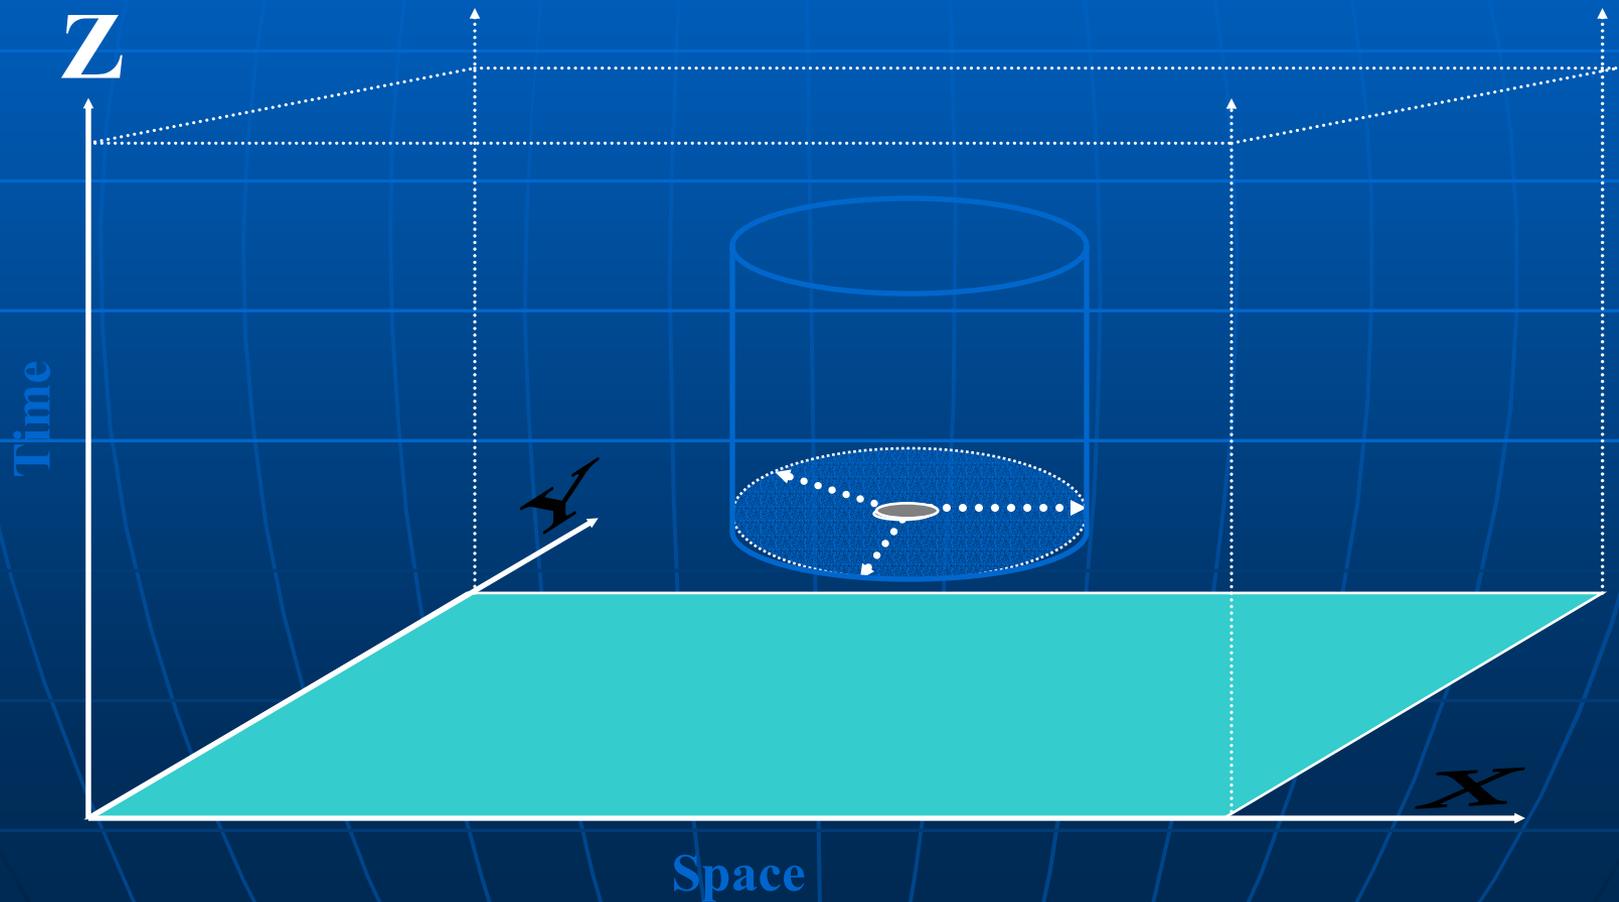

## Note

- GIS can compute cluster values for 10,000 records in 4 minutes

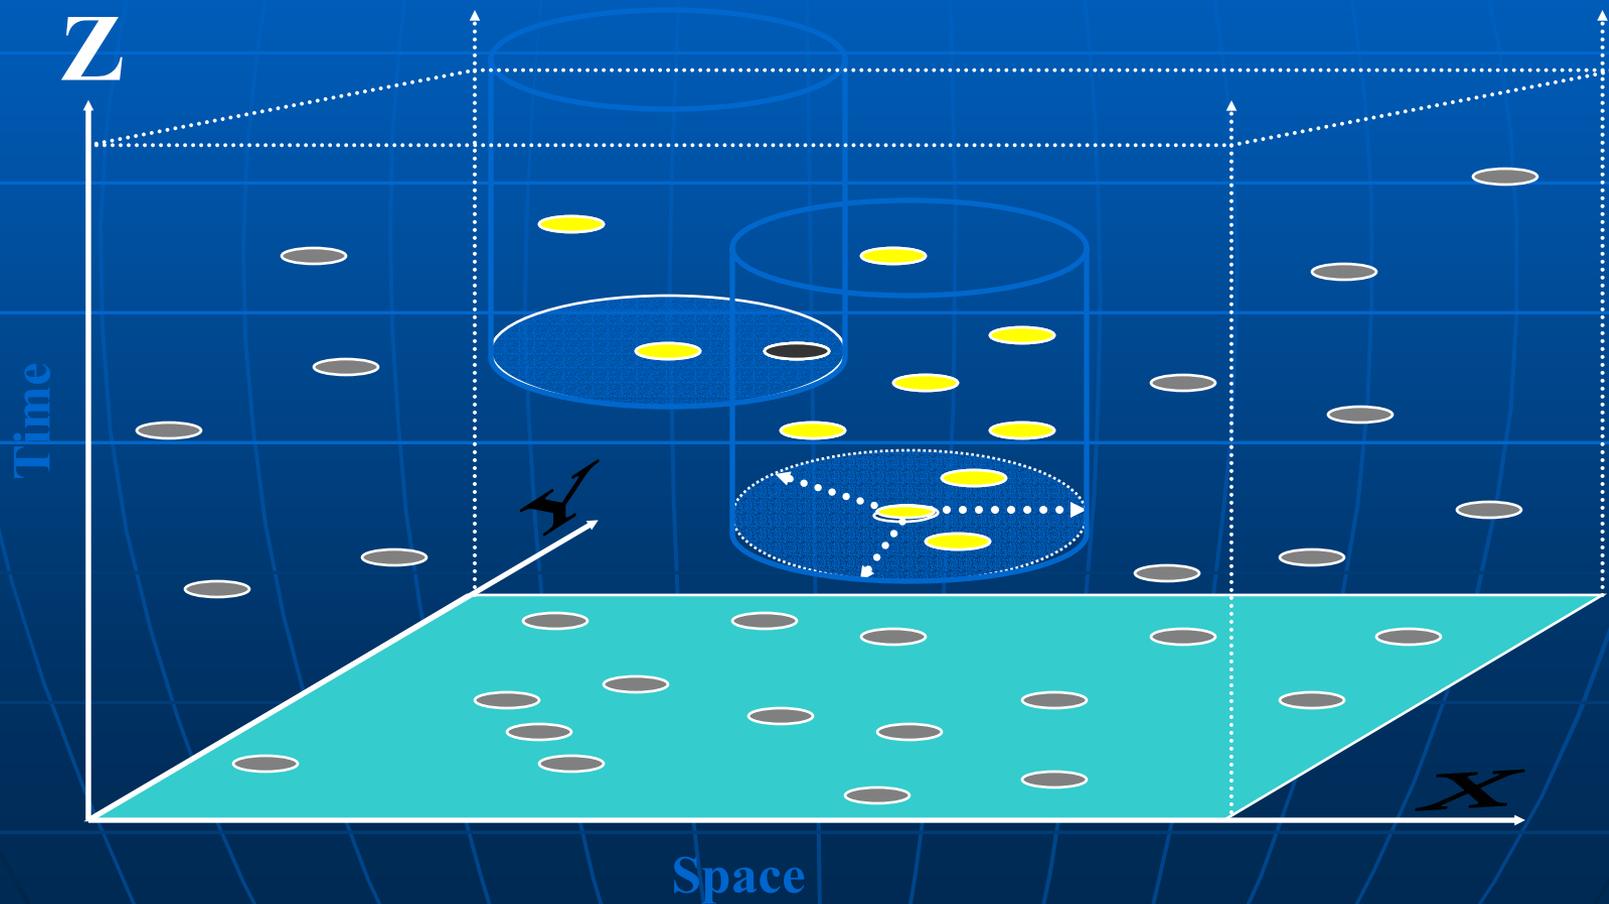

# Spatio-temporal Analysis

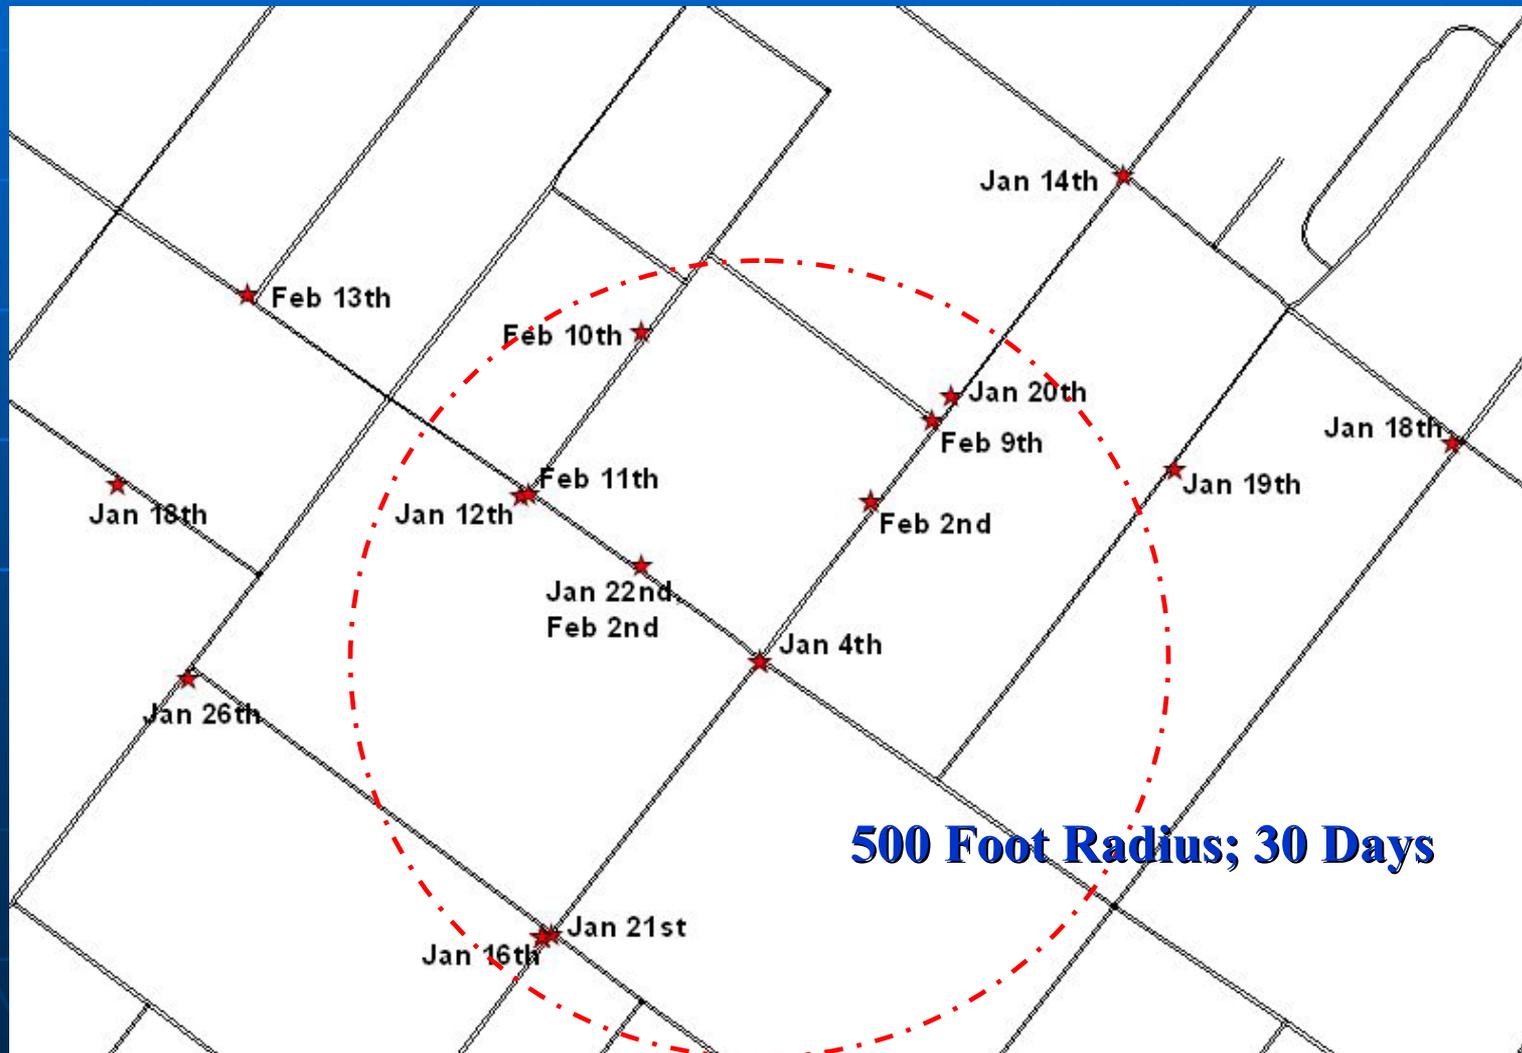

# Spatio-temporal Analysis

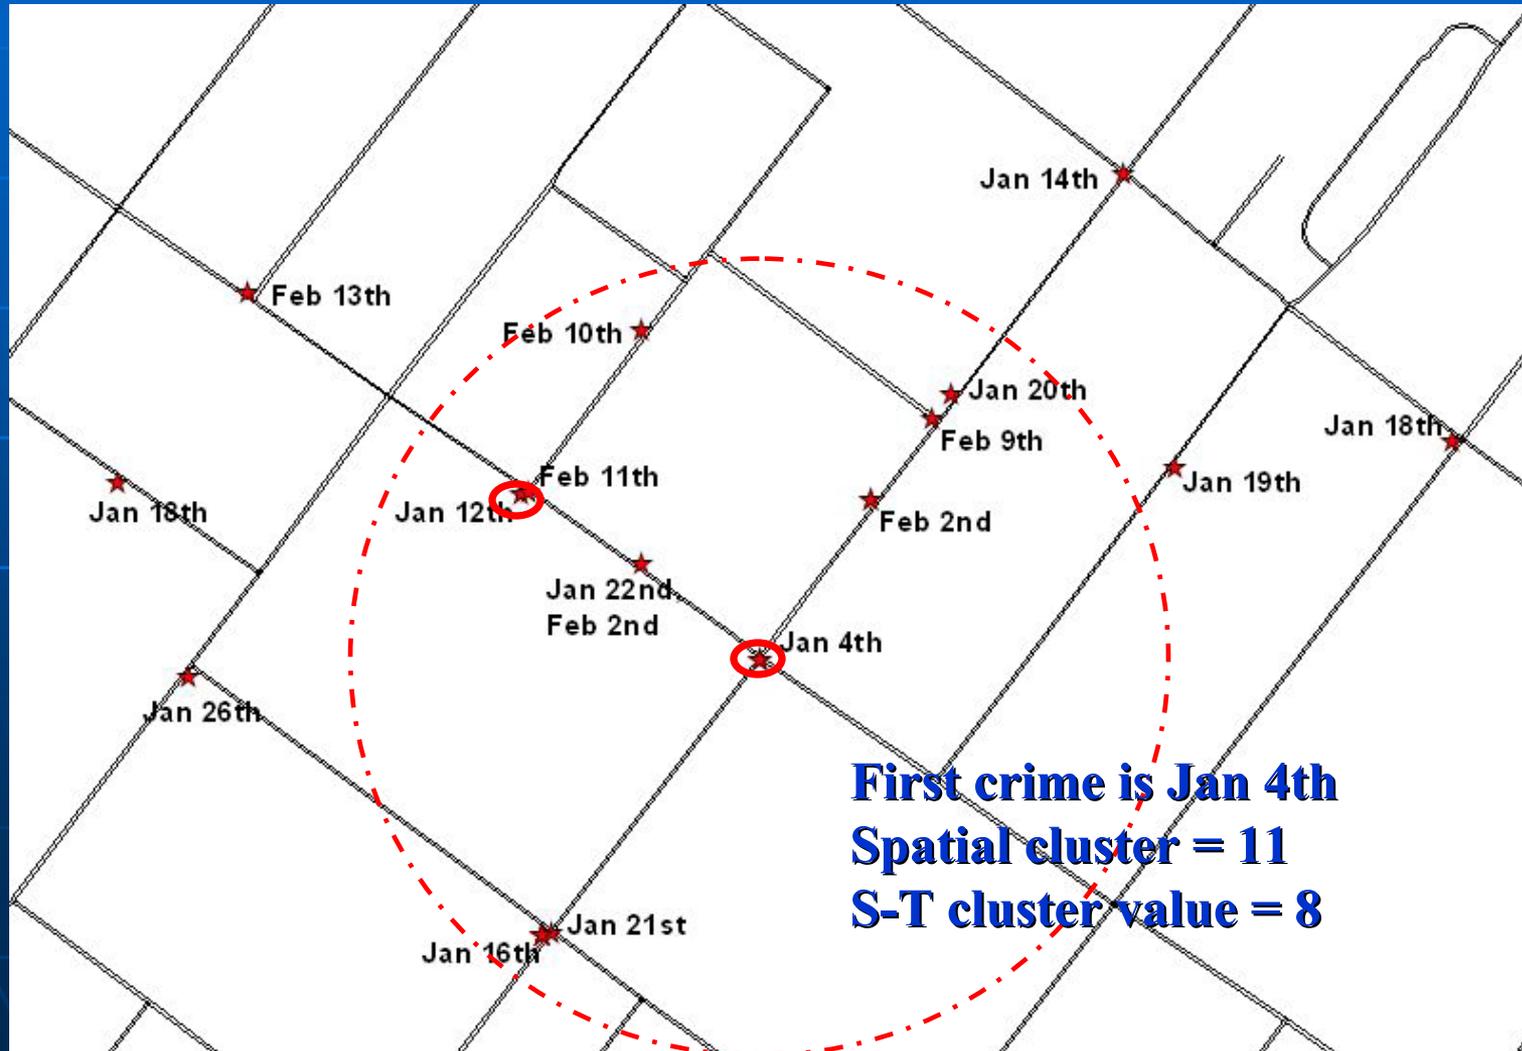

# Spatio-temporal Analysis

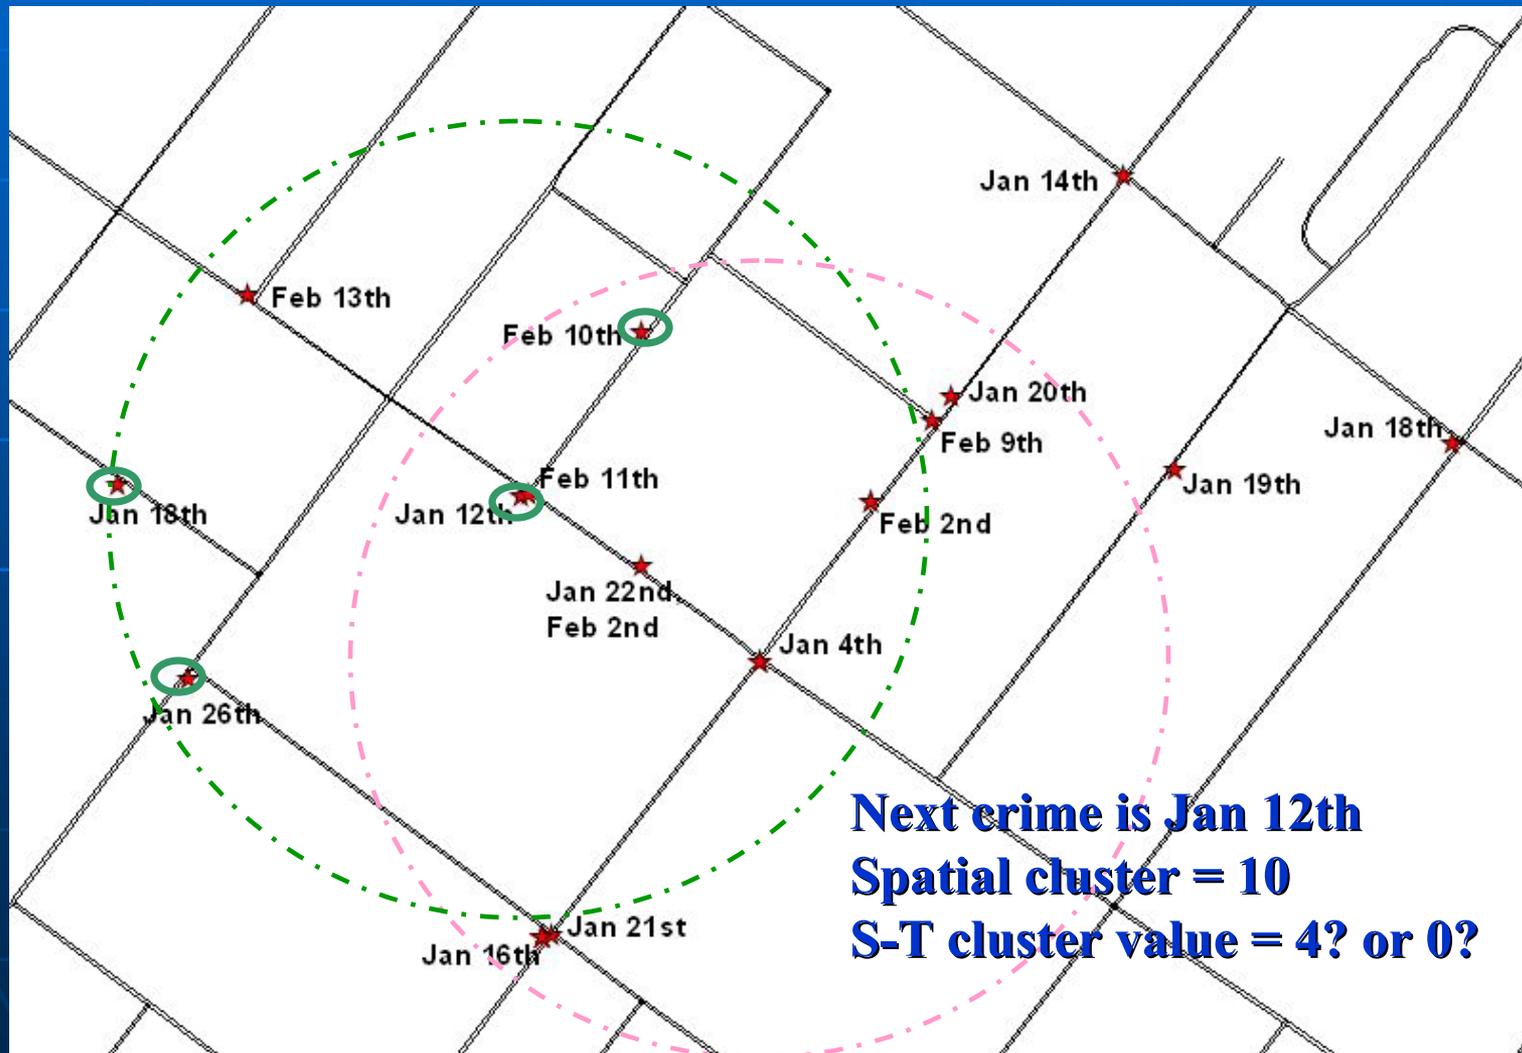

# Calculating Cluster Value

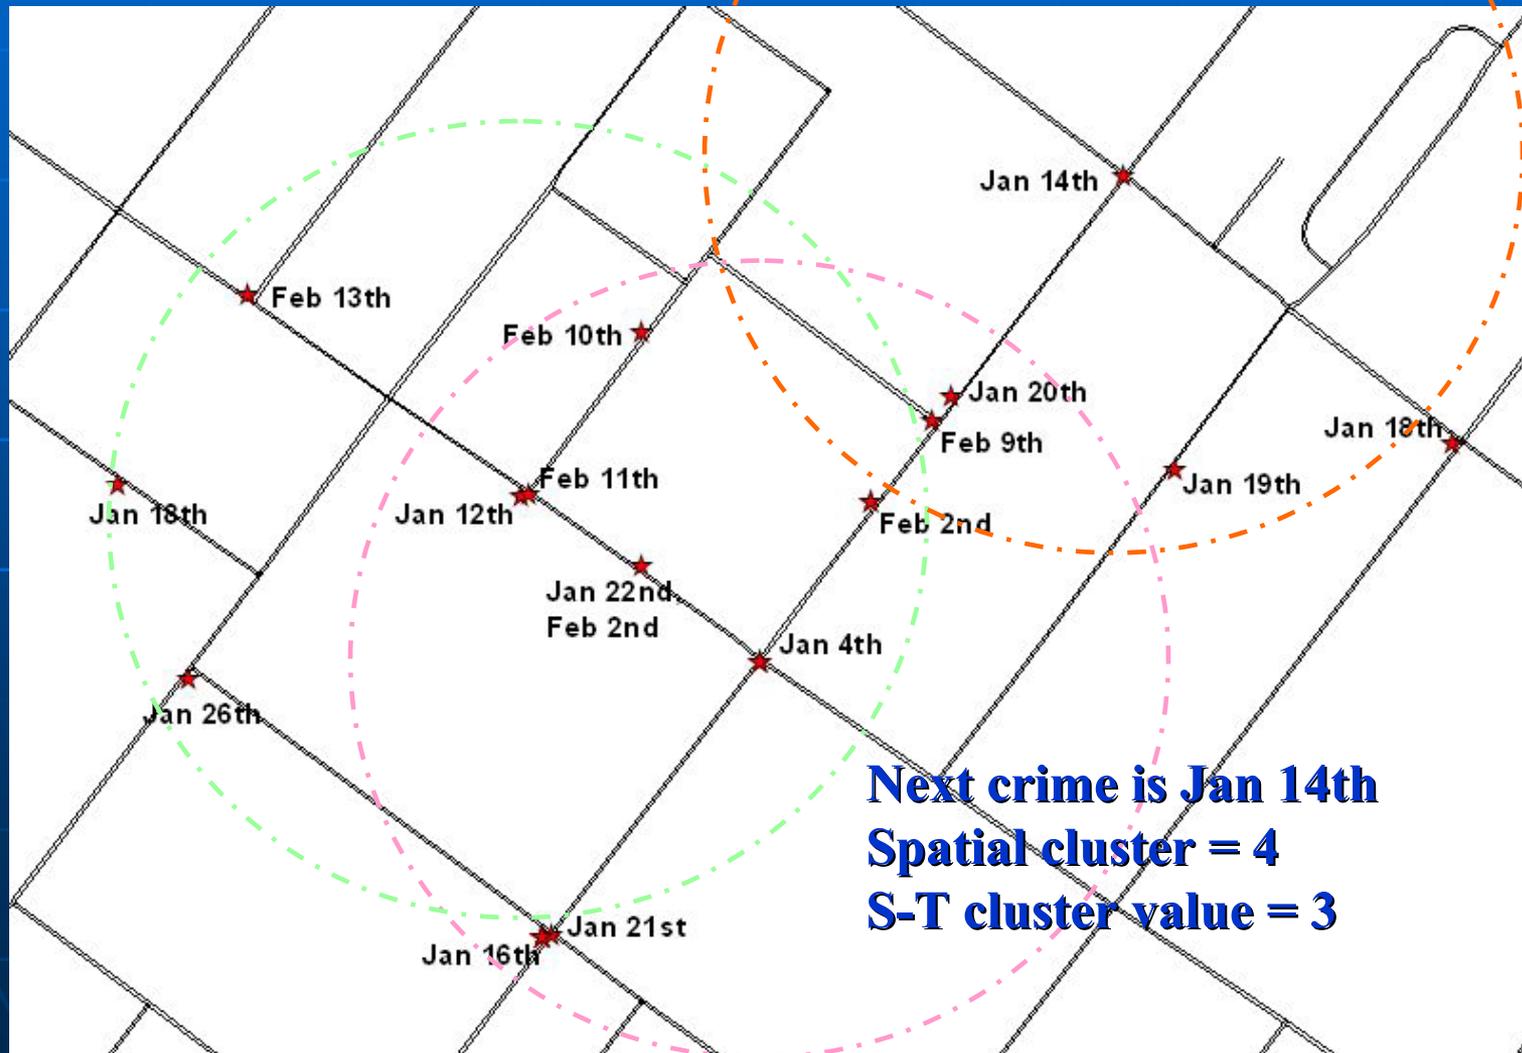

# Calculating Cluster Value

# Calculating Cluster Value

# Calculating Cluster Value

# Data

**Dependent Variable:**

**Violent Crime Clusters  
Property Crime Clusters**

**Independent Variables:**

**Security Staff (FTE)  
Sanitation Staff (FTE)**

**Control Variables:**

**Number of Businesses  
Zoned Residential  
Median Household Income**

# Findings

## PROPERTY CRIME

- Explanatory power of model is .297 (R-squared)
- Security regression coefficient is negative and significant
- Sanitation is positive and significant

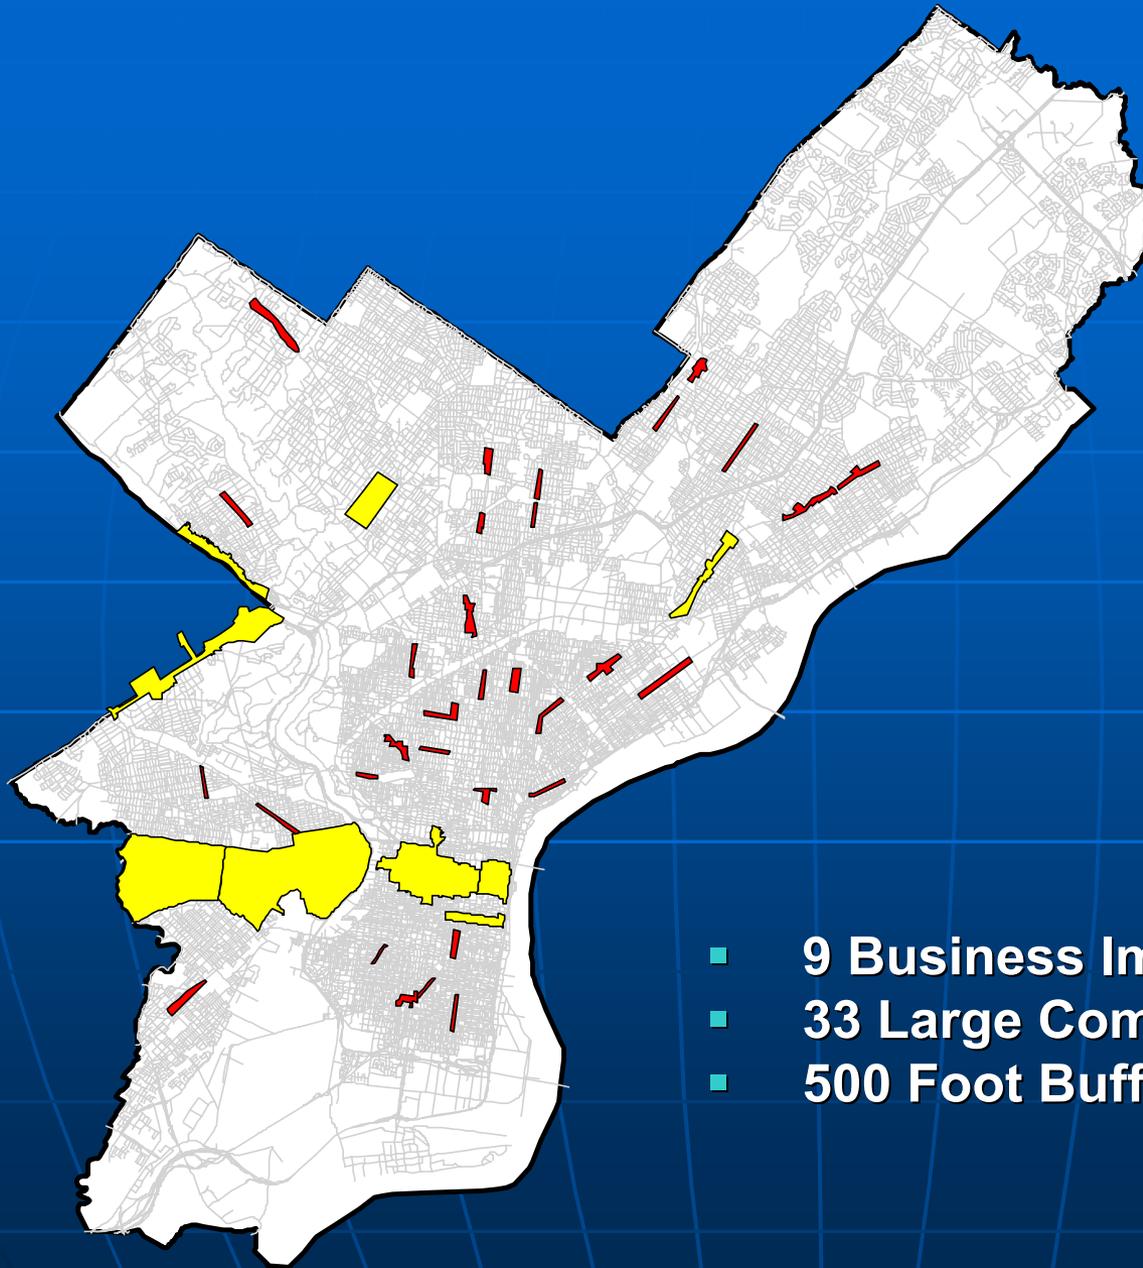

## VIOLENT CRIME

- Explanatory power of model is .085 (R-squared)
- Clusters are an inappropriate measure for predicting violent crime

# Research Design

- **Study Two**
- **Methods: Summary Statistics & Time Series Analysis**
- **Research Question:**  
**Do BID services push criminal activity to adjacent neighborhoods?**
- **Data Sources: Crime (1998 through 2001) and Cartographic**  
*Property = Robbery, Burglary, Theft, Auto Theft*  
*Quality of Life = Vandalism, Prostitution, Drug Activity, Drunkenness, Disorderly Conduct*
- **Related Research: McIver, Spiegel, and Hellman**

# Context

- 9 Business Improvement Districts
- 33 Large Commercial Areas
- 500 Foot Buffer

# Empirical Work on BIDs

- Property Crimes in BIDs and Commercial Areas

| Commercial Areas | 1998  | 1999  | 2000  | 2001  |     |
|------------------|-------|-------|-------|-------|-----|
|                  | 4,470 | 4,421 | 4,019 | 4,071 | -9% |

| Business Improvement Districts | 1998          | 1999          | 2000          | 2001          |             |
|--------------------------------|---------------|---------------|---------------|---------------|-------------|
| Center City District           | 5,771         | 5,162         | 4,336         | 4,328         | -25%        |
| South Street                   | 892           | 779           | 723           | 592           | -34%        |

# Empirical Work on BIDs

- Quality of Life Crimes adjacent to BIDs and Commercial Areas

| Adjacent Commercial Areas | 1998  | 1999  | 2000  | 2001  |     |
|---------------------------|-------|-------|-------|-------|-----|
|                           | 2,859 | 3,161 | 2,587 | 3,283 | 15% |

| Adjacent Business Improvement Districts | 1998  | 1999  | 2000  | 2001  |      |
|---|-------|-------|-------|-------|------|
| Adjacent Center City District           | 477   | 276   | 227   | 294   | -38% |
| Adjacent South Street                   | 228   | 137   | 150   | 206   | -10% |
| Adjacent Germantown                     | 88    | 62    | 63    | 83    | -6%  |
| Adjacent Frankford                      | 302   | 203   | 218   | 286   | -5%  |
| Adjacent Manayunk                       | 135   | 73    | 109   | 86    | -36% |
| Adjacent City Ave                       | 39    | 36    | 75    | 60    | 54%  |
| Adjacent Old City                       | 38    | 14    | 11    | 19    | -50% |
| Adjacent University City                | 175   | 144   | 115   | 138   | -21% |
| Adjacent Mercy-Health                   | 217   | 288   | 261   | 290   | 34%  |
| <b>Total</b>                            | 1,699 | 1,233 | 1,229 | 1,462 | -14% |

# Findings

## PROPERTY CRIME

- **Rate is decreasing more rapidly in BIDs than in commercial areas**  
*(9% in Commercial Areas, 18% in BIDs)*
- **Rate is significantly lower in neighborhoods adjacent BIDs**  
*(Down 35% overall)*
- **Steady in neighborhoods adjacent commercial areas**

## QUALITY OF LIFE CRIME

- **Rate is up in commercial areas and adjacent neighborhoods**  
*(12% AND 15%, respectively)*
- **Rate is down in BIDs and adjacent neighborhoods**  
*(9% AND 14%, respectively)*

# Summary

- **BID organizations have a positive impact within the BID**
- **BIDs not have a (negative) impact around the BID**
- **Need to look beyond Philadelphia**
- **Need to move beyond crime**
