

#### **Assignment 4 (class), Report (25%) – May 10<sup>th</sup>**

*Assignment 4:* The final product for LCW is an argument, supported by the data you have collected and analyzed in the ArcGIS project, which describes how an aggressive IDA program would impact the City of Lawrence and the North Common neighborhood. You will prepare a comprehensive report that articulates a vision for using IDAs as a strategic (collective instead of individual) and place-based economic development tool. Keep in mind that LCW will later use this document to secure funding from foundations and other funders to expand their IDA program. In addition, a member from each group will present this report at the May 10<sup>th</sup> RGI Steering Committee.
